Introduction

Identifi

Identifi is a suite of software modules allowing the storage and retrieval of document images. Additionally, documents can be tracked for expiration, retention and compliance.

Logging in to Identifi

Log into Identifi by double-clicking the Identifi shortcut located on the desktop or by entering the installation's address into a browser page ([http://\[servername\]/identifi.net](http://[servername]/identifi.net)).

The User will be prompted to enter their credentials. The password is case-sensitive. If the User ID and password are not accepted, or the User does not have a User ID assigned, please contact the Identifi administrator.

If Identifi is configured to use the customer's Active Directory (AD), then the logon is seamless. The User will not be prompted to enter the logon credentials.

If the installation has been configured for **Single Sign-On** with Azure or Okta, the button to Logon with those credentials will present along with or instead of the Identifi User ID and Password.

Forgot Password

The Forgot Password link is only available if AD is not being used, as passwords will not be updated automatically. However, if AD is being used on the installation, passwords are automatically changed when the User changes their network password.

It is suggested that Users change their password at least every 60-90 days. Password Expiration is set at the installation level.

1. From the login screen, click the “Forgot Password” link.
2. The following message will be displayed:

3. User will receive an email with a link to reset the password.

Clicking the link will open a dialog box, allowing the User to select a new password.

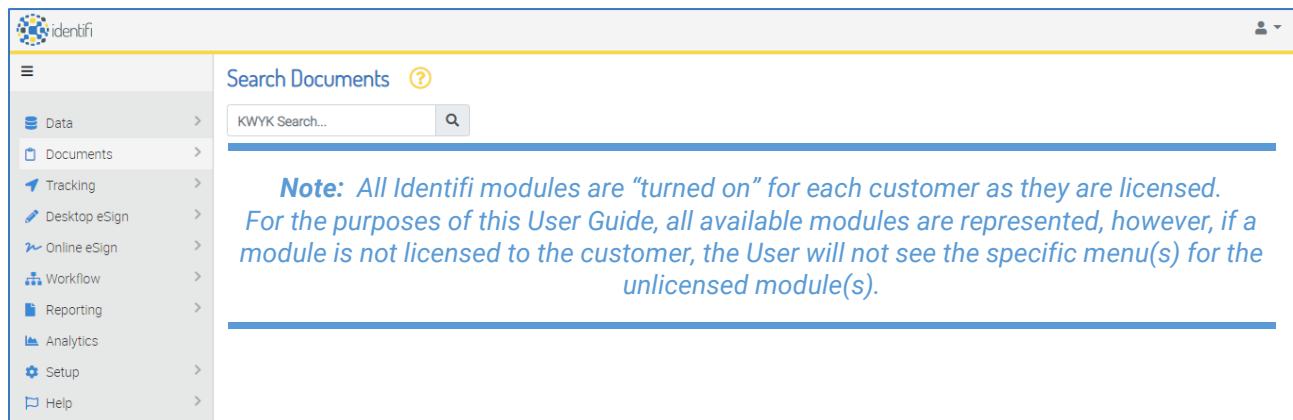

Note: Business rules for strong passwords require that a password be **at least 12 characters, contain an uppercase and lowercase character, a digit or special character and no spaces.**

4. After confirming the new password, User will be directed to the Identifi login screen.

Main Page and Navigation

Once the User is logged in, the Document Search screen will be displayed.

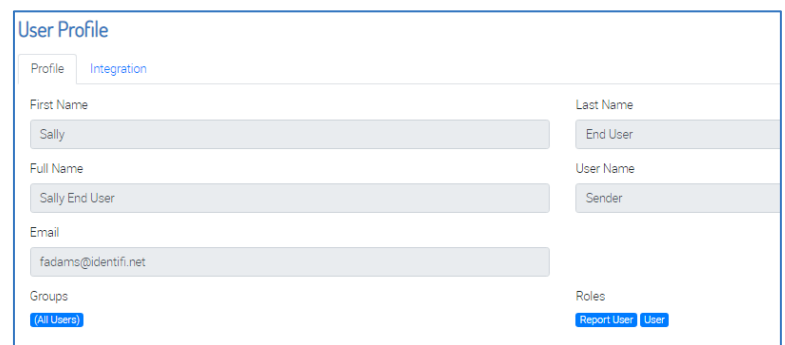

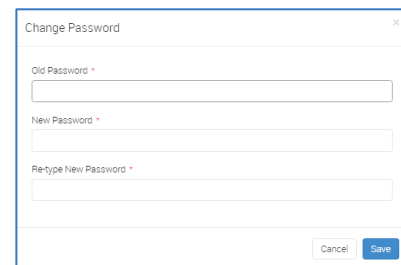

The left side bar contains a menu of sections in Identifi. Based on licensing and the User's assigned Roles, the menu will only show the sections to which the User has access.

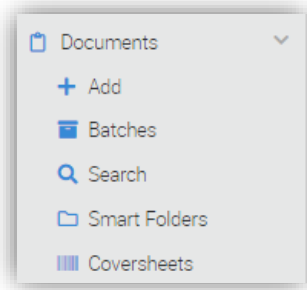

The upper right corner contains a drop-down menu:

- To exit the system, use the drop-down menu at the top right, next to User Name, and select **Logoff**.
- Select **Change Password** to initiate a password change.
- Select **Settings** to view user details.
 - **Profile Tab: (Settings)** Details of the User Profile include Profile information for that User as well as any Role(s) assigned to the User and any Group(s) to which they have been added.
 - **Integration Tab:** Used on installations with custom configuration where Identifi calls to the API. For details on this, see your administrator.

Documents

Adding Documents to the Archive

Documents are added to the archive through scanning or importing. The following features will be covered here:

1. +Add
2. Scan Client
3. Uplink

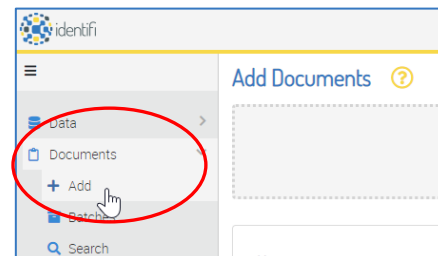

Add

Allows the User to add electronic documents to the archive using “Drag and Drop” or browsing for files on the computer.

Drag and Drop

Click on “Documents - +Add” from the left menu bar.

1. Open Windows Explorer on the computer and locate the file(s) you wish to upload.
2. Highlight and select the file(s) and “drag” the file(s) from the Explorer window into the “Add Documents” box.

Add Documents ?

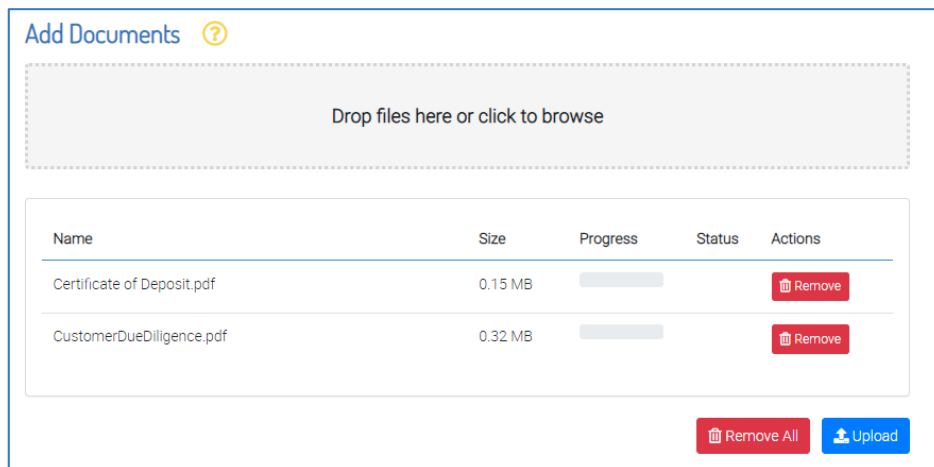

Drop files here or click to browse

Name	Size	Progress	Status	Actions
Certificate of Deposit.pdf				

Remove All Upload

Note: Documents can also be dragged from the Desktop or from an email.

3. The selected files will be added to the queue.

Add Documents ?

Drop files here or click to browse

Name	Size	Progress	Status	Actions
Certificate of Deposit.pdf	0.15 MB			Remove
CustomerDueDiligence.pdf	0.32 MB			Remove

Remove All Upload

4. Click the "Upload" button.

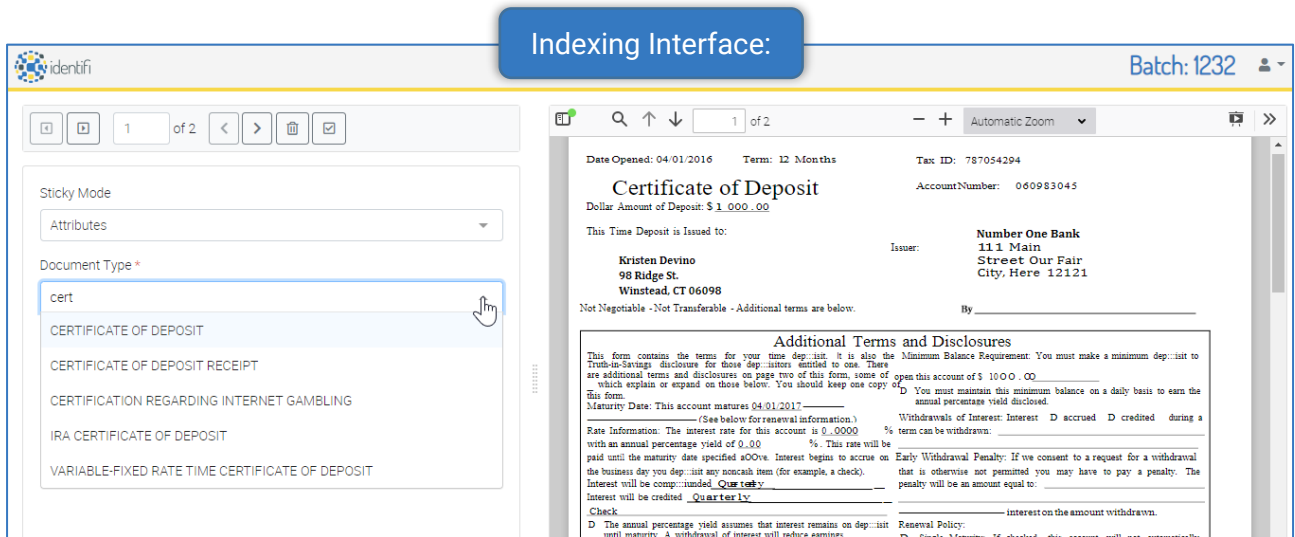

5. A dialog box will prompt the User to Choose an Application from the drop-down.
 Note: All documents being added must belong to the same Application.

An *Application* is a category of Document Types.

For example: The Document Type “Photo ID” may belong to the Customer Application, and “Invoice” may belong to the Vendor Application.

6. Select the appropriate application and click “Upload” to launch the **Indexing Interface**, allowing the User to enter attribute values for indexing. For details on the indexing process, see [Navigating the Batch](#).

Note: Clicking the browser’s “Back” button will exit the Indexing Interface, and the batch of documents will be saved in the Batches queue to be indexed at a later time and will display the Action “Continue.”)

<input type="checkbox"/>	Action	Batch
<input type="checkbox"/>	Continue	1168

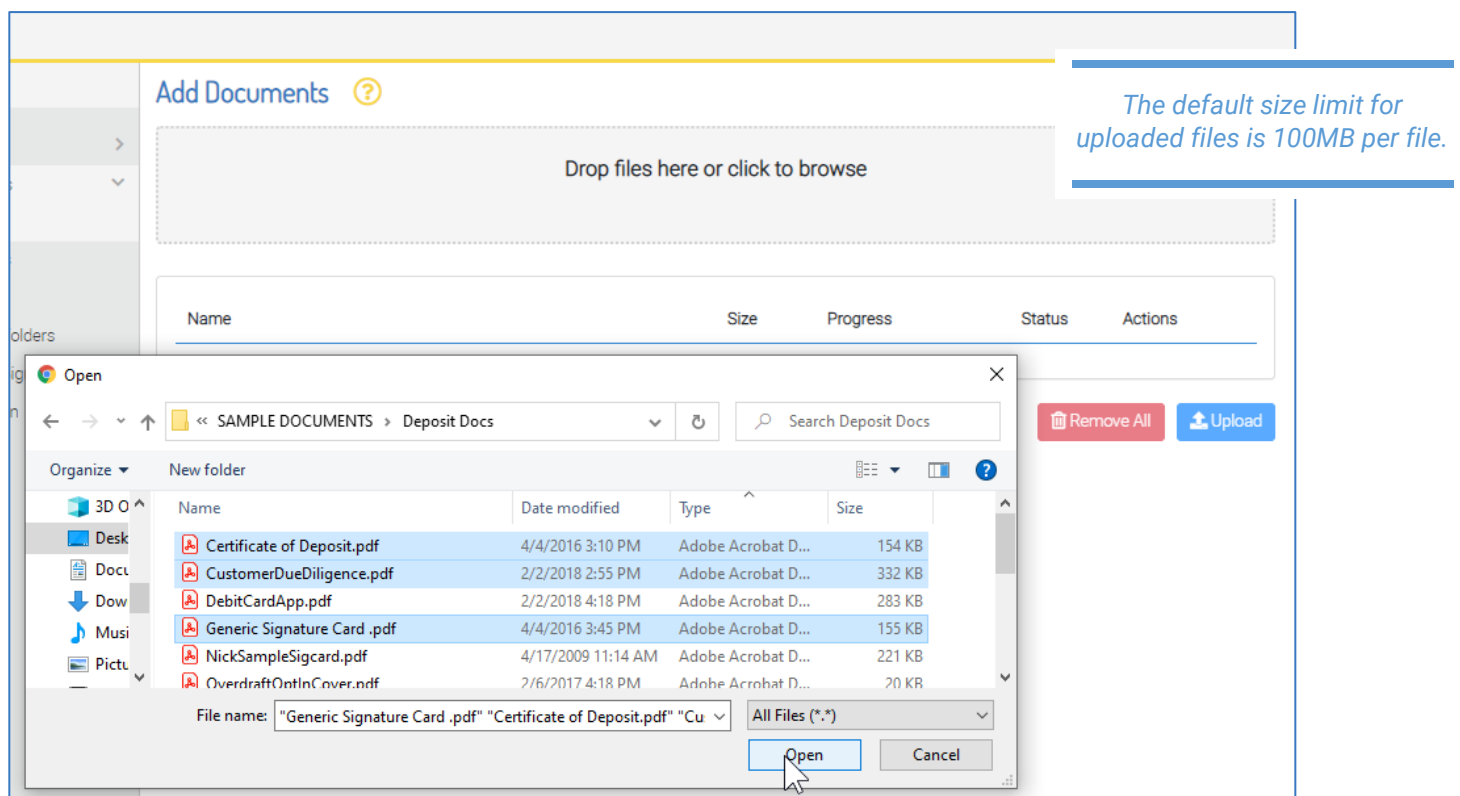

The batch will be saved and can be accessed at a later time from the Batch queue. (See [Navigating the Batch](#).)

Browse

1. Clicking inside the box ("**Drop files here or click to browse**") will open up a Windows Explorer window from the computer.

2. Locate the documents you wish to add and double click the file, or multi-select files and click "Open" at the bottom right of the window, to add selected files to the queue.

Follow instructions for "Drag and Drop" listed above, beginning with [Step 5](#).

Scan Client

1. From the Windows Start Menu () select the Program **Scan** to launch the Scan Client.

(Note: The first time the Scan Client is launched the User may be prompted to “Run” the program.)

2. Choose the **Scan Plan** to direct the documents to the appropriate Application(s). Unless the Scan Plan is configured for multiple Applications, all documents in a batch must belong to the same Application.

(Note: Only those Scan Plans with no assigned security or those to which the User has been given Permissions will appear in the list of available Scan Plans).

Scan Plans direct the documents being added to the appropriate Application in the system.

3. Place documents in the scanner.
4. Click “Add.”
5. Enter a Batch Title if requested.

*A **Batch Title** is a temporary title given to the batch of documents being scanned and helps to easily identify the batch in the queue for indexing.*

Once a batch has been indexed, the title is no longer available in the batch queue and is not retained in the system.

6. Review scanned images within the Scan Client window by navigating pages or by launching thumbnail view (click the Thumbnail button from the bottom menu, press the spacebar on the keyboard or double-click the image).

7. Selecting the **Thumbnail Properties** icon to the right of the Thumbnails icon will allow the User to view the images as Small, Medium and Large by clicking the icon or selecting the choice from the dropdown menu.

8. Before completing the batch for indexing, users have the opportunity to:

- **“Add”** additional images to end of the batch
- **“Open”** add electronically-stored documents to the batch
- **“Insert”** new scanned image(s) in *front* of a selected image
- **“Replace”** the selected image
- **“Remove”** selected image(s), and
- **“Rotate”** selected image(s). (**Note:** each click of the mouse will rotate the selected image(s) 90 degrees).

Documents or pages within a batch can also be re-ordered by dragging and dropping.

Note: To select multiple pages, use the “Shift” or “Control” keys on the keyboard and click the pages to which the action will apply. Holding down the “Shift” key while selecting pages will allow the User to select consecutive pages; Holding down the “Control” key allows the User to select non-consecutive pages.

9. When satisfied, click on **“Complete”**, then select **“Yes”** to save the batch.

Once saved, the batch will be available for retrieval and indexing from the “Batches” menu, located under “Documents” in Identifi.

Importing Electronic Images Using the Scan Client

Users may also use the Scan Client to add electronically-stored images to the archive.

1. Follow steps 1 and 2 above.
2. Select the **“Open”** button from the Scan Client menu. A Windows Explorer window will open, allowing the User to navigate to, and select, the file(s) to be imported. Enter a Batch Title if prompted.
3. Follow steps 4 through 7 above.

Uplink

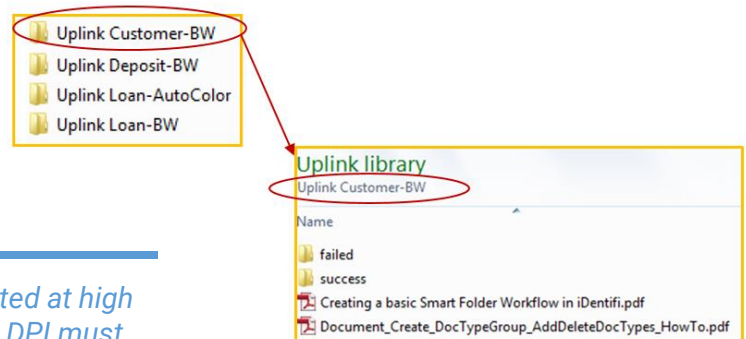

Uplink allows users to scan documents to specific folders on a network scanner and those documents are automatically brought into Batches for indexing.

Uplink is a separately-licensed module. To add Uplink to your Identifi installation, contact Identifi Sales.

Scanning with Uplink

Users will select the folder using the interface of the multifunction printer or through the desktop software associated with the scanner.

Folders are associated with, and function like, Scan Plans, directing the document images to the appropriate Application within Identifi.

For Best Results: Documents should be printed at high resolution (laser vs. inkjet) and the scanner’s DPI must be set at a minimum of 200. 300 DPI is recommended.

Once those documents have been scanned, the Uplink service sweeps whatever is in the folder out and into the Batch queue for indexing.

Batches ?											
<input type="button" value="Delete"/> <input type="button" value="Assign"/> <input type="button" value="Remove Assignment"/> <input type="button" value="Retry"/>											
1 Available and Failed Batch										Available and Failed	
										2036	
<input type="checkbox"/>	Action	Batch	Title	Status	Application	Scan Plan	Files	Assigned To	Created By	Created Date/Time	Created on Machine
<input type="checkbox"/>	<input type="button" value="Index"/>	2036	UPL: 5010	Ready to Index	Loan	<input type="button" value="Tricia Test BW"/>	1		dryder	2/11/2022 9:01 AM	INTEGRADEVDR

Using the Uplink Cover Sheet will populate the **“Created By”** column so that Users can easily locate their scanned batches. **Note:** Without a cover sheet, the batch will show Created By **“UplinkUser”**. See [Using Barcode Cover Sheets and Separator Sheets](#) for details.

Clicking on **“Index”** will assign the batch to the User and will populate the **“Assigned To”** column. See [Batches](#) for instructions on the indexing process.

Using Uplink Without a Scanner

Dragging or copying PDFs to the Uplink folder on the network drive will also allow the documents to be swept into batches for indexing. Each PDF will appear as individual batches, so using cover sheets and separators would require that they are part of the PDF itself. **Note:** Rights to the folders on the network are required.

Retrieval of Uplink Documents

Documents scanned into Identifi through Uplink are retrievable like all other stored documents—through *Documents Search*. For details on searching, see [Document Search](#).

Using Barcode Cover Sheets and Separator Sheets

Barcode Cover Sheets and Separator Sheets are found in the main menu under *Coversheets*, found under *Documents*. These can be printed or saved as a PDF and reused with Uplink and Scan Client batches.

For information on viewing and printing cover sheets, click [here](#).

*The minimum Role required to access and print cover sheets: **User Role***

Uplink User Cover Sheets: The cover sheets identify the user that has scanned the Uplink Batch, populating the 'Created By' column in Batches with their username. To use, place the coversheet as the first page in the batch of documents being scanned to the Uplink folder.

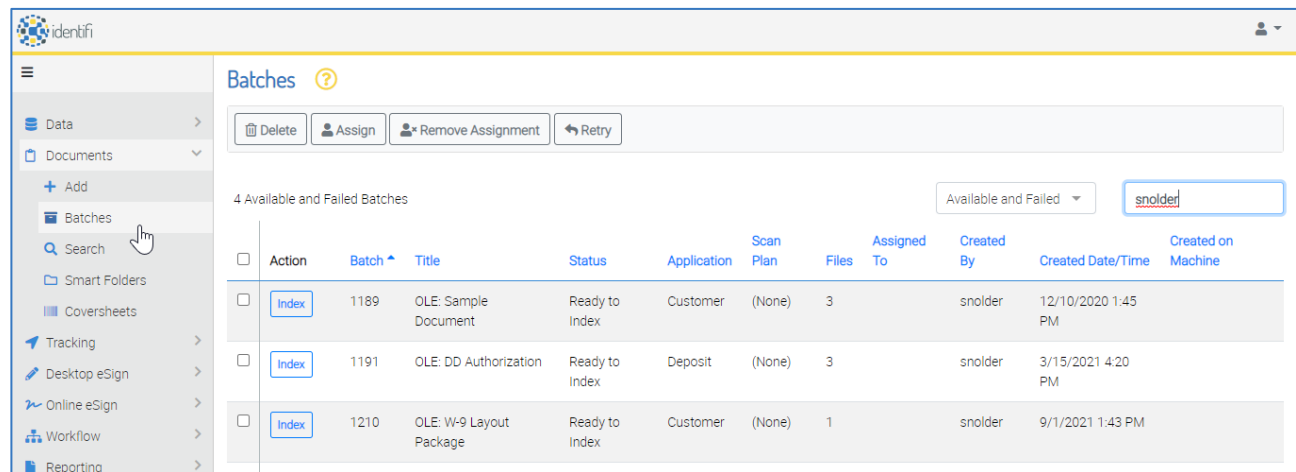

Document Type Cover Sheets: These cover sheets are placed in front of non-barcode documents in a batch to indicate the Document Type. The document type will automatically select from the drop-down menu during indexing. ***Configuration at the Scan Plan/Uplink Folder level is required for these to be recognized properly.**

Identifi Break Doc Separator Sheets: These are generic barcode separator sheets placed between non-barcode documents in a batch, indicating the first page of a new document. The "This file starts a new document" box will automatically be checked and the image of the separator sheet will be dropped from the batch during indexing.

Batches

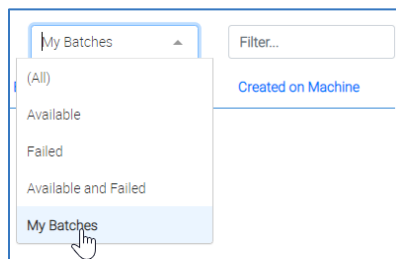

Allows the User to access existing batches available for indexing and completion. Select **"Batches"** under **"Documents"** from the left sidebar to launch the Batch queue.

4 Available and Failed Batches

Available and Failed

<input type="checkbox"/>	Action	Batch	Title	Status	Application	Scan Plan	Files	Assigned To	Created By	Created Date/Time	Created on Machine
<input type="checkbox"/>	Index	1189	OLE: Sample Document	Ready to Index	Customer	(None)	3		snolder	12/10/2020 1:45 PM	
<input type="checkbox"/>	Index	1191	OLE: DD Authorization	Ready to Index	Deposit	(None)	3		snolder	3/15/2021 4:20 PM	
<input type="checkbox"/>	Index	1210	OLE: W-9 Layout Package	Ready to Index	Customer	(None)	1		snolder	9/1/2021 1:43 PM	

Within the batch queue is a drop-down filter box allowing Users to view batches available to them for indexing and specifically select their own batches.

Note: Only the User's Assigned batches will be shown using the "My Batches" selection. To see both "Assigned To" and "Created By" batches for the User, enter the User Name into the search filter to the right of the drop-down.

The list can be sorted by clicking on a column header. *For example*, to sort by the Date/Time a batch was created, click on that column header and the list will be sorted by creation date.

Batch Titles:

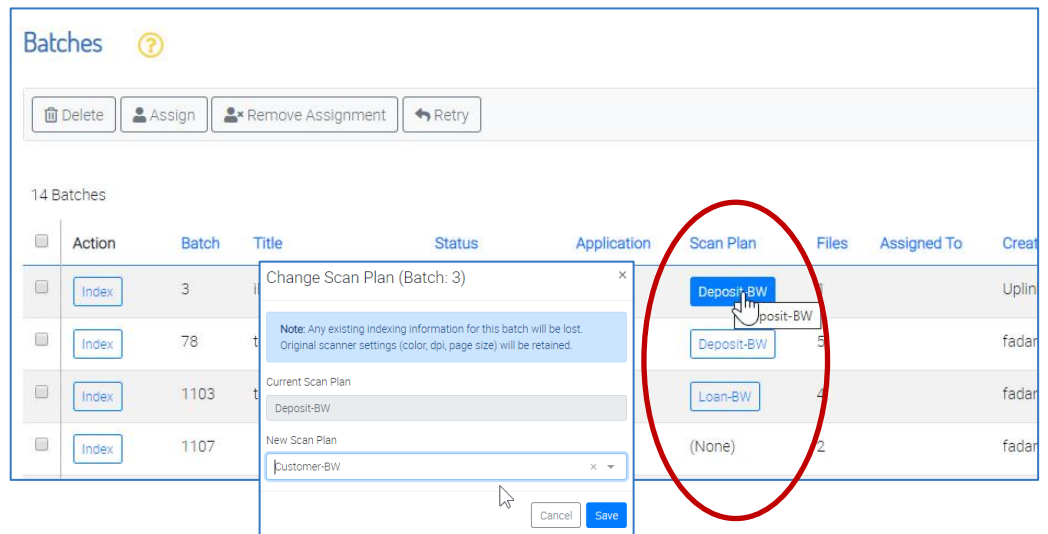

- Scan Plan Batches may have unique titles assigned during the scan process.
- Uplink Batches will automatically be titled "iDentifi.Uplink Batch"
- Online eSign Batches will be named based on the Package title; i.e. "OLE: New Account Documents"
- Batches brought in through *+Add* will not have a title.

Batch Actions:

- Batches that are unindexed have the Action “**Index**” associated with them.
- Batches that were started but not completed, have the Action “**Continue**.”
- If no Action is available, the User does not have the required Permissions to complete the Batch, or another User is currently indexing the batch.

Documents scanned using an incorrect scan plan can be corrected by clicking the link in the **Scan Plan** column and making the desired change.

Note: Batches brought in using the Add feature or Online eSign, do not use Scan Plans, so “(None)” will be displayed in the Scan Plan column.

Action	Batch	Title	Status	Application	Scan Plan	Files	Assigned To	Create
Index	3				Deposit-BW			Uplin
Index	78				Deposit-BW			fadar
Index	1103				Loan-BW			fadar
Index	1107				(None)			fadar

In addition to the above, a User with the **Batch Administrator Role** will also be able to:

- **Delete** batches from the queue
- **Assign** batches to specific Users, thereby removing them from the general batch queue
- **Remove Assignment** from a specific User
- **Retry** Failed Batches

Clicking “**Index**” or “**Continue**” launches the Indexing Interface where attribute values are entered on the left, and the document image is visible on the right.

Click and drag the split screen icon  to adjust window size.

The screenshot shows the 'Indexing Interface' for a document titled 'POWER OF ATTORNEY'. On the left, there are several fields: 'Sticky Mode', 'Attributes', 'Document Title Override (optional)', and 'Document Type'. The 'Document Type' field is set to 'att' and 'POWER OF ATTORNEY'. A red circle highlights the 'Document Title Override (optional)' field. A blue box points to the 'Document Title Override (optional)' field with the text 'Document Title Override (optional)'. A blue arrow points to the scroll bar on the right of the document preview. A blue box at the bottom right contains the text: 'The scroll bar to the right of the image can be used to continuously scroll through each page in the document'. The document preview shows the text of the power of attorney, including the title 'POWER OF ATTORNEY' and the text 'GRANTOR OF POWER: YOU MUST INDICATE BELOW WHETHER OR NOT THIS POWER OF ATTORNEY WILL BE EFFECTIVE IF YOU BECOME INCOMPETENT. MAKE A CHECK OR "X" ON THE LINE IN FRONT OF THE STATEMENT BELOW THAT EXPRESSES YOUR INTENT.'.

Note: the Document Title Override field will only appear in the Indexing Interface if the Application has been configured to allow its visibility.

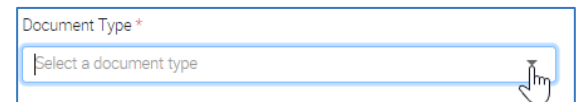

If the document has a barcode, indexing values within that barcode will already be present in the attribute fields. Other values may be entered manually, using drop-down menus and through Lookups. Fields marked with a red asterisk (*) are mandatory attributes; indexing cannot be completed without them.

The first required attribute field is always **Document Type**.

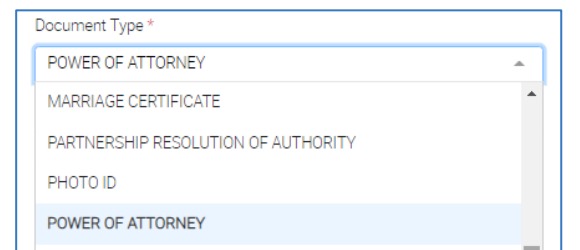

- Scroll through the list or start typing the name of the document (words within the Document Type name are also recognized).

The Document Type list is based on the assigned Application(s).

- If the Document Type exists within more than one Application, the User will choose the specific application from the Drop-Down list. The system defaults to the document's primary Application.
- If a Document Type is designated on the Scan Plan, then this value will be prefilled; however, the User can make adjustments if necessary.
- Document Type Cover Sheets can be used to automatically populate this field during indexing.

Document Type *

Document Type *

- POWER OF ATTORNEY
- MARRIAGE CERTIFICATE
- PARTNERSHIP RESOLUTION OF AUTHORITY
- PHOTO ID
- POWER OF ATTORNEY

Document Type *

Application *

- Accounts
- Accounts
- Loans

- The next required attribute field may be **Document Date**.

- In any date attribute field, in addition to clicking the calendar icon (📅), the down arrow can be used to access the calendar OR the date can be typed into the field.
- When manually entering a date, the system interprets a two-digit year to be 20YY.

The Document Type's Lookup Attribute field is usually the **Account Number** or **Tax ID**.

Multi-Value Attributes: The same image can be indexed to multiple accounts/customers by clicking the Add Icon.

Click the “+” icon, add the additional information to the Indexing panel and hit the “Tab” or “Enter” keys on the keyboard to perform the lookup and add the value.

The Indexing panel will then reflect the change, and the values can be reordered using the icon to the left of each attribute.

Lookup: Attribute that looks up the account/customer information in Data.

- The Lookup returned no values/information.

- The Lookup was successful and pulled back available data for all related attributes.

If the Lookup is successful, the related Attribute fields will populate.

Other Common Attribute Fields:

- **Description:** Usually not a required field, Description can be made searchable to allow for additional searching options. Institutions often have an official procedure for using this field.
- **Source** and **Security:** populated by the system automatically.
- Indicate the first page of a new document in a batch.
 - Use this check box to begin indexing a new document.
 - If an Identifi Barcode Separator Sheet has been placed in the batch OR the documents themselves are barcoded, this box will automatically be checked.

This file starts a new document

Note: Applies to scanned batches only, not available in batches from Add.

Choose your Sticky Mode

Sticky Mode

Sticky Mode determines what “sticks” from one document to the next in a batch. For example, with a batch made up of all Signature Cards for different customers, the User would select **Doc Type** as sticky; or, with a batch of account documents for the same customer, **Attributes** would be selected as sticky.

- **None** – no indexing information will prefill on documents in the batch.
- **Attribute** – will apply the same account number or Tax ID number, along with associated data, to each document in the batch.
- **Document Type** – will apply the same Document Type to each document in the batch.

Sticky Mode

Attributes

None

Attributes

Doc Type

Batches from Add will default to 'Attributes' sticky, while other types of batches will default to 'None'.

Navigating the Batch

Indexing Interface Icons:

The arrows to the left of the page number move from one document to the next.

- These are useful only for batches made up of barcoded documents OR batches with Barcode Separator sheets placed between documents.

The arrows to the right of the page number move from one page to the next.

The trash can will **delete** that page from the batch.

The check mark completes the indexing.

- If any required attribute is left blank (*for example, Document Date, as shown below*) the User will be returned to that attribute field, now highlighted in red, to enter the information before the batch can be completed.

To leave a batch and complete it at another time:

- ✓ Use the browser's Back button to exit the Batch. The batch will be visible in Batches with the action 'Continue' associated with it. Clicking [Continue](#) will reopen the batch to complete it.
- ✓ Click the Identifi logo in the top left corner to exit the Batch and be redirected to the Search Documents page. The batch will be retained in Batches with the action 'Continue' associated with it.
- ✓ Clicking [Continue](#) will reopen the batch to complete it.

Indexing Image Menus

Upper Menu

	Toggle to view thumbnails
	Find text in document <i>(not available on all document types)</i>
<input type="text" value="Find in document..."/> <input type="button" value="←"/> <input type="button" value="→"/> <input type="checkbox"/> Highlight all <input type="checkbox"/> Match case	
	Navigate pages of the document
<input type="text" value="1 of 4"/>	Jump to another page in the document
	Zoom in/out
<input type="text" value="Automatic Zoom"/>	Automatic Zoom <i>(Actual size, page fit, page width, Percentage view)</i>
	Presentation mode (view full screen)
	Print the document
	Download the document
	Reveal additional Tools
	

Note: With Scanned batches (not Add), a User is able to rotate the document image (for some file types) within the indexing interface, and orientation changes will be saved when indexing is complete.

Retrieving and Viewing Documents

Document Search

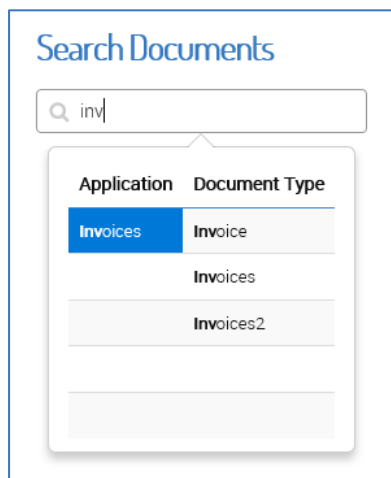

Allows the User to search within the document archive.

Identifi's **Document Search** feature functions like most internet search engines. Once you start typing the information you know about the item you are seeking (KWYK = "**Key What You Know**") into the Search Documents bar, the system will begin to offer suggestions.

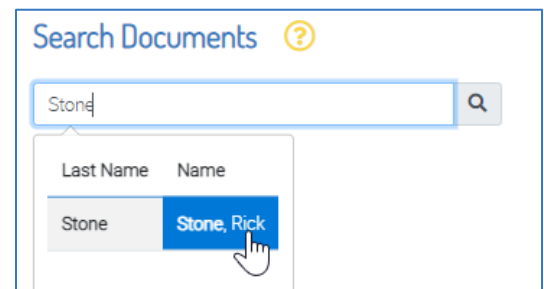

Common attribute values that are searchable: *Account Number, Customer Name, Member Number, Location*. Application and Document Type names are also searchable, as well as other specific attributes (such as Status or Source).

Note: Which attributes are searchable and visible in search results is configurable for each installation and is managed by the System Administrator.

The system automatically searches across all Applications to which the User has Permissions and begins suggesting items to narrow the results. Selecting a term from the grid creates a 'search pill'.

Example: If you are searching for items associated with your customer with the Last Name Attribute *Stone*, as soon as you begin typing, Search will begin suggesting and predicting what you're looking for. Choose *Stone* from the Last Name column in suggestion grid, or the customer's full name if it's offered, and a search will be completed, returning all items associated with that attribute.

Narrowing Search Results

Once results have been returned, simply enter another term in the Documents Search bar to continue the search- this will narrow your initial results, getting to the most specific information you're seeking. Each search criteria is found in a "pill". They can be removed by clicking the **X** and viewed in more detail by clicking the **V**. There is no limit to the number of pills a search may contain.

The Search feature allows search results to be sorted and filtered. The default sort order of documents is set to Storage Date Descending, reflecting the most recently added documents at the top.

All columns are sortable, and results can be narrowed using the Search Filter field (above columns on the right) or by adding another search criterion.

Example: This Search was initially completed using Account Number 12345, then narrowed by the Document Date for the year 2014.

Search Documents ?

KWYK Search... 12345 x 1/1/2014 - 12/31/... x

Displaying 100 Documents [Show Total](#) Top 100 Documents

<input type="checkbox"/>	Title	Application	Document Type	Pages	File Type	Storage Date	Document Date	Transaction amount	Transaction Type
<input type="checkbox"/>	12345.Doe.John.Q.W-9 CERTIFICATION 2014/10/01	Loans	W-9 CERTIFICATION	1	Tif	6/14/2017	10/1/2014		
<input type="checkbox"/>	12345.Doe.John.Q.UCC-1 STATE 2014/10/01	Loans	UCC-1 STATE	1	Tif	6/14/2017	10/1/2014		
<input type="checkbox"/>	12345.Doe.John.Q.TITLE UPDATE 2014/10/01	Loans	TITLE UPDATE	1	Tif	6/14/2017	10/1/2014		
<input type="checkbox"/>	12345.Doe.John.Q.TITLE POLICY-BINDER 2014/10/01	Loans	TITLE POLICY-BINDER	1	Tif	6/14/2017	10/1/2014		

Clicking on the icon to the right of the Search Filter box allows the User to "Export to Excel." A CSV file containing the search results will open in Excel and can be edited, saved, etc. as needed.

Search Documents ?

KWYK Search... 12345 x 1/1/2014 - 12/31/... x

Displaying 100 Documents [Show Total](#) Top 100 Documents

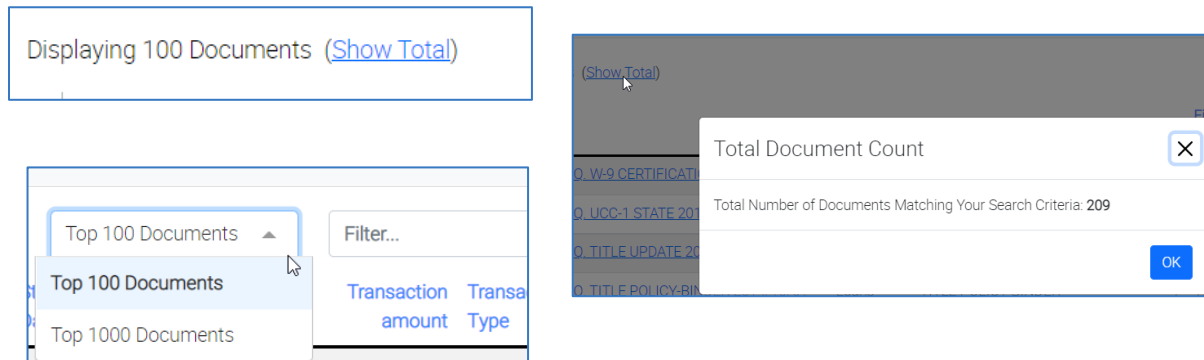

<input type="checkbox"/>	Title	Application	Document Type	Pages	File Type	Storage Date	Document Date	Transaction amount	Transaction Type
<input type="checkbox"/>	12345.Doe.John.Q.W-9 CERTIFICATION 2014/10/01	Loans	W-9 CERTIFICATION	1	Tif	6/14/2017	10/1/2014		
<input type="checkbox"/>	12345.Doe.John.Q.UCC-1 STATE 2014/10/01	Loans	UCC-1 STATE	1	Tif	6/14/2017	10/1/2014		
<input type="checkbox"/>	12345.Doe.John.Q.TITLE UPDATE 2014/10/01	Loans	TITLE UPDATE	1	Tif	6/14/2017	10/1/2014		
<input type="checkbox"/>	12345.Doe.John.Q.TITLE POLICY-BINDER 2014/10/01	Loans	TITLE POLICY-BINDER	1	Tif	6/14/2017	10/1/2014		

Note: Search results displays 100 Documents.

Be sure to add search terms to narrow the search to less than 100 documents.

Clicking on "Show Total" will give you the number of documents stored in the archive for the selected criteria.

Clicking on the drop-down to the left of the Filter box will expand the search to display the Top 1000 Documents.

Document Search Advanced:

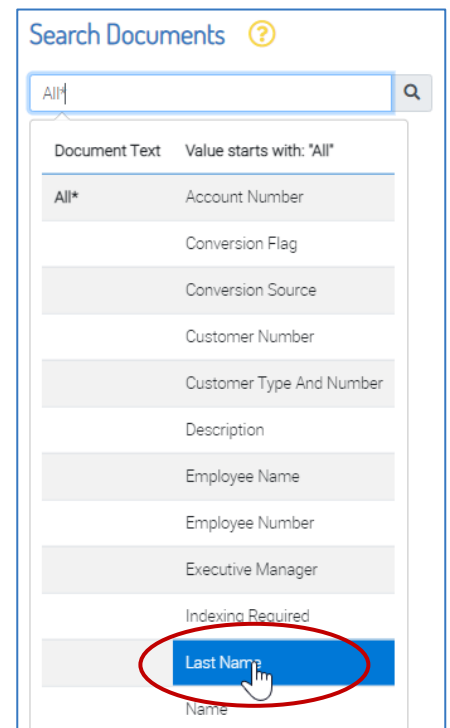

Advanced searching offers some very powerful search capabilities such as: Wildcard, Smart Text, Smart Date, Smart Currency and Smart Number searching, each using its own syntax.

1. **Wildcard Searching** allows you to search within text attributes for words or phrases that contain your search term. Select from the "Value Start with" column in the Suggestion Grid.

The syntax used is an **asterisk (*)**. Enter the portion of the search term you know, followed by an asterisk.

Example: If you're searching for all documents associated with a specific customer, but you're not sure if the last name is Allan or Allen, enter All* in the Document Search field and choose the Last Name attribute from the suggested list.

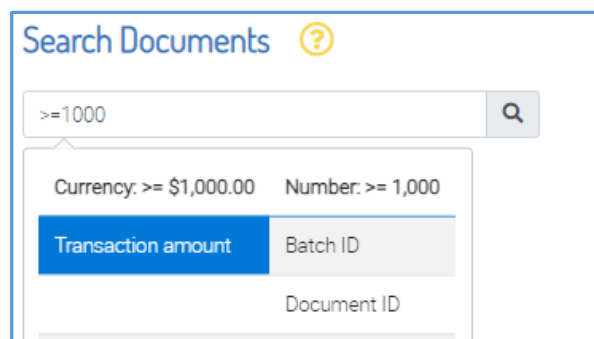

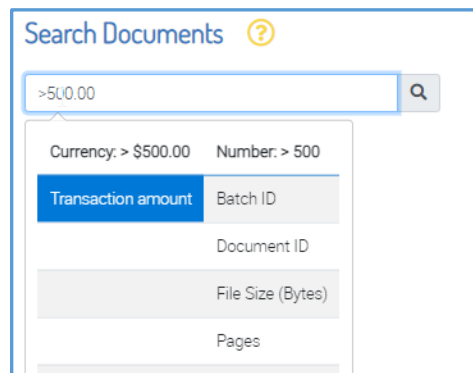

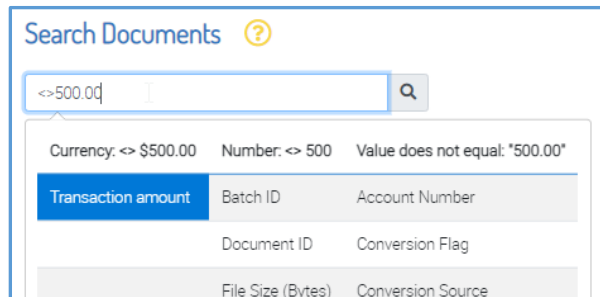

Note: The attributes must be set as wildcard searchable in order to appear in the list.

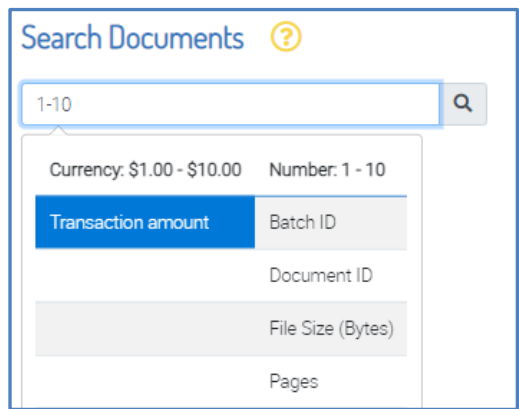

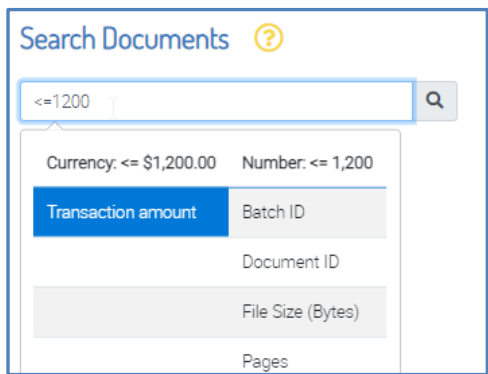

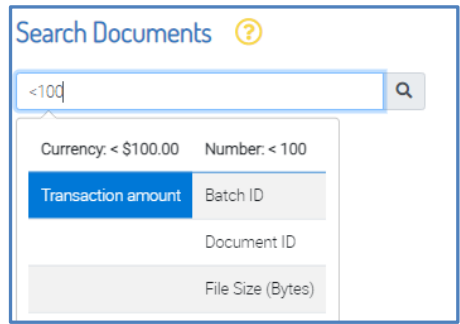

2. **Smart Number Search** and **Smart Currency Searches** are selected from either the Currency or Number columns in the Suggestion Grid.

The syntax is as follows used for these types of searches are:

<p><> (greater than and lesser than signs)</p>	<p>For values that are not equal to your search term</p>
<p>> (greater than sign)</p>	<p>For values that are greater than your search term</p>
<p>>= (greater than and equals sign)</p>	<p>For values that are greater than or equal to your search term</p>

<p>< (<i>less than sign</i>)</p>	<p>For values that are less than your search term</p>
<p><= (<i>less than and equals sign</i>)</p>	<p>For values that are less than or equal to your search term</p>
<p>Term 1 - Term 2 (<i>dash</i>)</p>	<p>For values that are between (inclusive of) your two search terms</p>

Smart Date Searches are selected from the Date Type column in the Suggestion Grid. The types of dates listed will depend upon the sorts of Date Attributes configured on the installation.

The syntax is as follows:

<> (*greater than & less than signs*)

Search Documents ?

 Q

Date: <> 1/1/2021 Value does not equal: *1/1/21*

As Of Date	Account Number
Close Date	Conversion Flag
Document Date	Conversion Source
Expiration Date	Customer Number
Hire Date	Customer Type And Number
Open Date	Description
Report Post Date	Employee Name
Report Run Date	Employee Number
Revision Date	Executive Manager
Storage Date	Indexing Required
Termination Date	Last Name

For values that are *not* equal to your search term

> (*greater than sign*)

For values that are greater than your search term

>= (*greater than and equals sign*)

The screenshot shows a search interface titled "Search Documents" with a search bar containing ">= 1/1/21". A dropdown menu is open, showing a list of date-related fields: "Date: >= 1/1/2021", "As Of Date" (highlighted in blue), "Close Date", "Document Date", "Expiration Date", "Hire Date", "Open Date", "Report Post Date", "Report Run Date", "Revision Date", "Storage Date", and "Termination Date".

For values that are greater than or equal to your search term

< (*less than sign*)

The screenshot shows a search interface titled "Search Documents" with a search bar containing "< 1/1/21". A dropdown menu is open, showing a list of date-related fields: "Date: < 1/1/2021", "As Of Date" (highlighted in blue), "Close Date", "Document Date", "Expiration Date", "Hire Date", "Open Date", "Report Post Date", "Report Run Date", "Revision Date", "Storage Date", and "Termination Date".

For values that are less than your search term

<p><= (less than and equals sign)</p>	<p>For values that are less than or equal to your search term</p>
<p>Term 1 - Term 2 (dash)</p>	<p>For values that are between (inclusive of) your two search terms</p>

The screenshot shows a search interface titled "Search Documents" with a search bar containing "<=|1/1/21". A dropdown menu is open, listing various date fields: "Date: <= 1/1/2021", "As Of Date" (highlighted in blue), "Close Date", "Document Date", "Expiration Date", "Hire Date", "Open Date", "Report Post Date", "Report Run Date", "Revision Date", "Storage Date", and "Termination Date".

The screenshot shows a search interface titled "Search Documents" with a search bar containing "1/1/21-1/31/21". A dropdown menu is open, listing various date fields: "Date: 1/1/2021 - 1/31/2021", "As Of Date" (highlighted in blue), "Close Date", "Document Date", "Expiration Date", "Hire Date", "Open Date", "Report Post Date", "Report Run Date", "Revision Date", "Storage Date", and "Termination Date".

<p>(Today)</p> 	<p>For dates that are equal to today's date</p>
<p>(Today + n)</p> 	<p>For dates that are equal to today's date plus (+) n number of days</p>

<p>(Today - n)</p> 	<p>For dates that are equal to today's date minus (-) n number of days</p>
--	--

***Note:** All other Smart Date Search operators can be used in conjunction with (Today), like **>=(Today)**.

When using Smart Date Search, years beginning with 20 can be shortened to two digits (i.e. 2019 can be entered as 19). For months and days 1 – 9, a leading zero is not required.

Actions Available from Document Search Results

Select specific document(s) by placing a next to the document title.

Once documents have been selected, the User may perform the following actions (depending on roles and permissions assigned) from the **upper menu bar**:

Search Documents ?

12345 x 5/1/2021 - 5/31/2... x

6 Documents Filter...

Printing Documents from Search Results

Print the selected document(s)

Place next to item(s) to be printed and click "Print." Selecting more than one document will result in the creation of a bookmarked .pdf.

- The system will prompt a dialog box regarding which documents to print:

Once a selection is made, a second dialog box may open warning about the time required to print large or multiple documents. Select "Print" to continue.

- The document(s) will open in Adobe Acrobat as a .pdf and can be printed from there or saved.

Downloading Documents from Search Results

Downloading documents in Identifi downloads the documents in their stored file format. There are two methods available to download documents from Search results.

- Select *one or more* documents by clicking the check box to the left of the title and then **Download** in the upper menu.

Download icon circled in red.

Deleting Documents from the Archive (from Search Results)

Delete the selected document(s)

Place next to item(s) to be deleted, then click the “Delete” button in the tool bar. The User must have the *permissions* to Delete at the Application, Doc Type and Document levels.

Note: *Deleting documents removes them from the system entirely, including other Identifi modules and may disrupt function.*

Moving Documents from one Application to another

This feature allows documents to be moved from one application to another application. This not only moves the image, but also **all** of the attributes associated with the image. **Use this feature with caution.**

- Place next to item(s) to be moved.
- Click on the “Move” icon.
- Select a Target Application from the drop-down menu.
- Click “Continue.”

Select A Target Application

Application

Alex

Cancel Continue

Choose Which Documents To Move

All documents matching my search criteria

Only the documents that I have selected

Cancel Continue

- Choose which documents to move.
- Click “Continue.”

Note: The user must have the Document Mover or Administrator Role in order for the button to appear in the menu.

Index (“Mass Index” or “Mass Modify”)

This feature is often referred to as ‘Mass Index’ or ‘Mass Modify’ and is used to change the indexing values of one or multiple stored documents from the Search Documents results.

In order for this feature to be available, the Search must include an Application as one of the search “pills.”

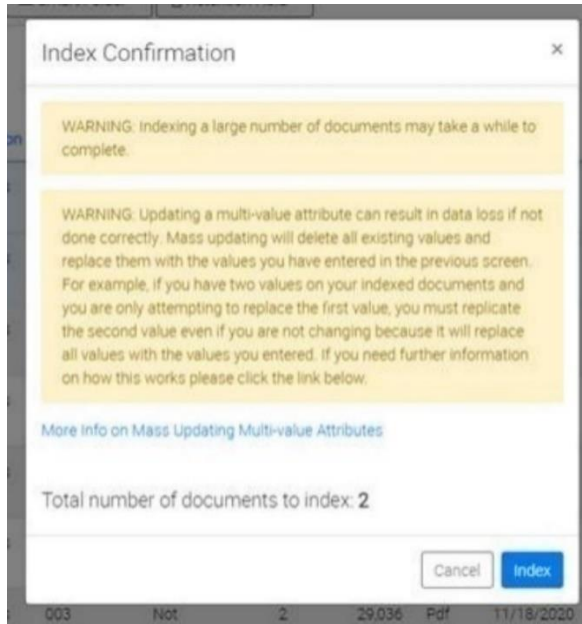

Search Documents ?

Accounts 12345 x 5/1/2021 - 5/31/2... x

Application Document Text

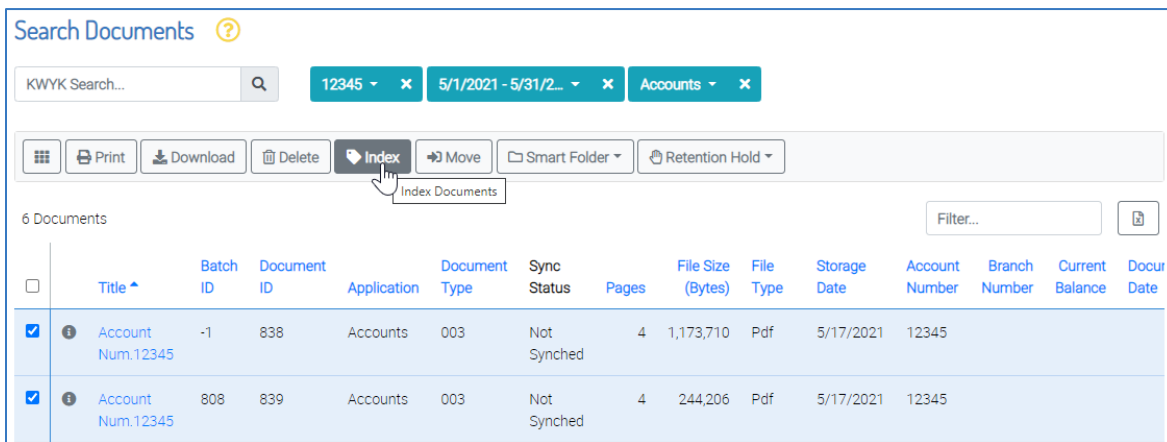

Accounts accounts

Delete Index Move Smart Folder Rete

Note: Because this process **overwrites the previous attribute data**, and if not done correctly could cause data to be lost, caution should be exercised whenever this feature is used, especially when updating **multi-value attributes**.

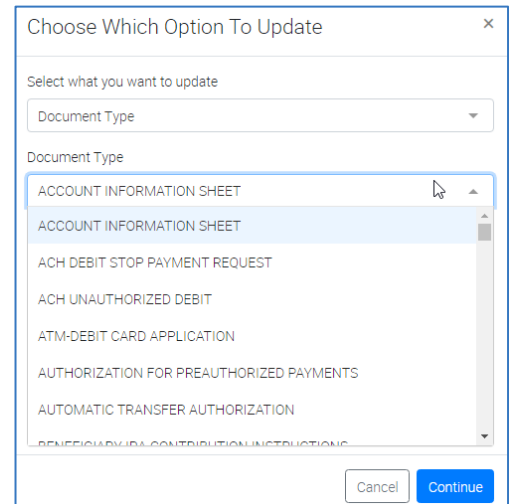

1. Place next to item(s) and select **Index** in menu bar.

2. Select to update *either* an Attribute or the Document Type.

3. **Updating the Document Type:** Choose the new document type from the drop-down list, then click **Continue**.

4. **Updating an Attribute:** Select the attribute to be modified from the drop-down list.

- For single value attributes, enter a new value in the field provided and click **Continue**.

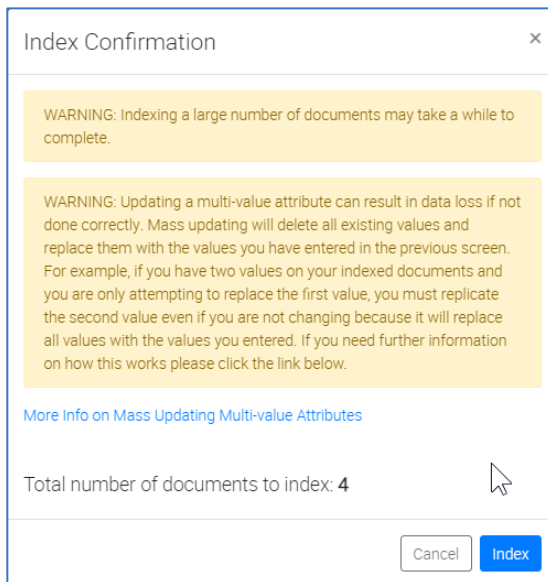

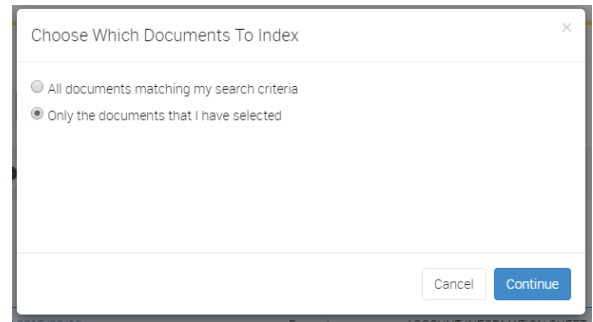

- For multi-value attributes, click the plus sign to add additional fields. All values of the attribute on the documents must be entered here, in the order they appear in the indexing panel, even those not be updated as part of the re-indexing process. Once all values have been entered, click **Continue**.

NOTE: ALL attribute values must be entered, not only the value to be changed; otherwise, those attributes not entered will appear blank in the Indexing Panel.

Before attempting, see [this article in the Help Center](#) for more information on this powerful process.

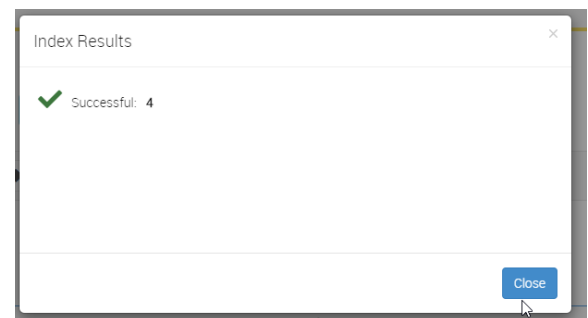

Select which documents will be re-indexed (typically it is **Only the document that I have selected**) and then confirm the total number of documents that will be affected by the indexing process in the next dialogue box.

NOTE: Updating multi-value attributes **must be done carefully to avoid data loss.**

EACH attribute value must be entered, in order of appearance on the documents, regardless of whether it will be changed or not.

The final dialogue box will display the number of documents successfully and/or unsuccessfully re-indexed.

Creating a Smart Folder

A Smart Folder is a saved Documents Search. To create a Smart Folder:

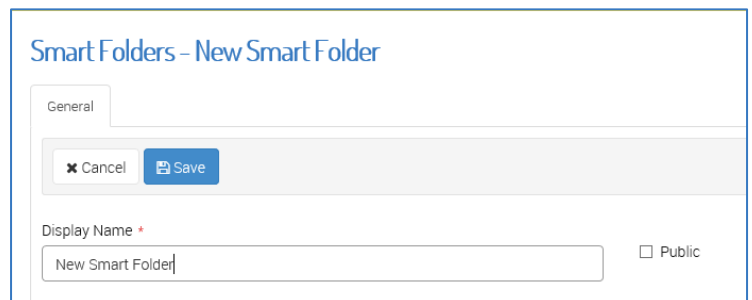

- Perform the Search.
- Click on “Smart Folder” from the upper menu bar.
- Select **Add**.

The system will create a Private Smart Folder for that search.

A Public Smart Folder can also be created for access by other Users (depending on User Permissions).

See [Smart Folders](#) for additional information on accessing saved Smart Folders.

Place (or remove) a Retention Hold

To prevent a document or documents from being deleted or affected by a Retention Policy (if one is assigned), a **Hold** can be applied to the document(s).

To place a **Hold** on a document or documents from Search results, place a next to item(s) and select **Place on Hold** from the **Retention Hold** dropdown in menu bar.

Select **Take Off Hold** to free the document.

The Information icon will display a status of **Locked** when a **retention policy** is in effect on a document.

Source

Listed below are the various panels and a full description of each. User *Permissions* determine access to Panels and their features.

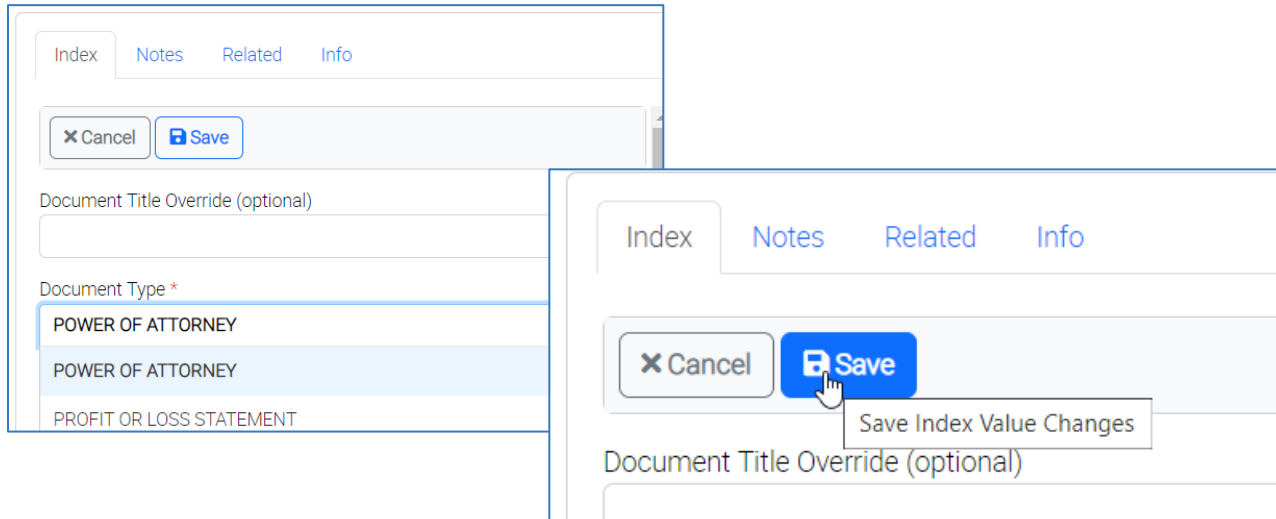

Index Panel - Displays indexing attribute values for current document. If the User has Index permissions, the attribute values can be edited by clicking

Examples: changing the Document Date, the Document Type, re-syncing the Lookup Attribute, etc.

Once changes have been made, click “Save” to update the attribute value.

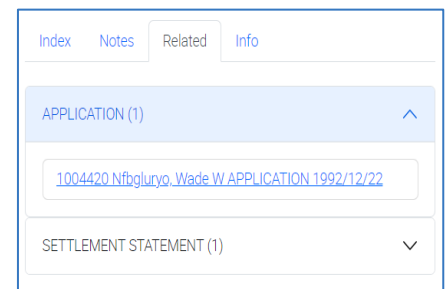

Notes Panel – Users with appropriate permissions can view, add and/or edit notes on the document. A number in the panel tab indicates the number of notes that exist on the document.

To add a note, click inside the box and type the note. Click the check mark icon to save.

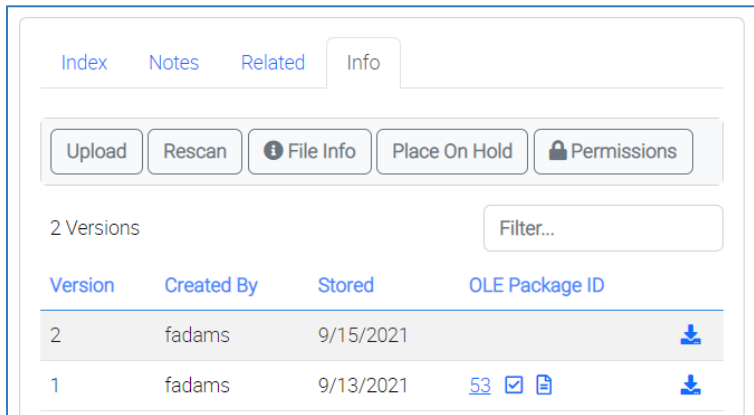

Related Documents Panel – Displays documents related by SSN/Tax ID (User must have permissions to images). Click on the hyperlink to view other documents for the same customer.

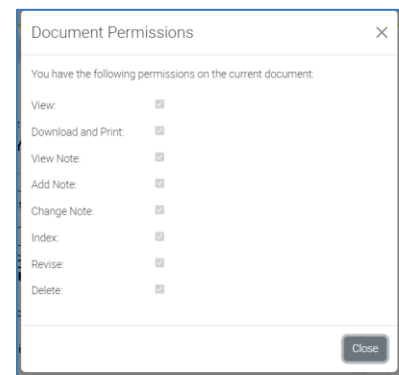

Info

Info Panel – Provides a button to reveal file information for this document and access to the versioning options within Identifi.

- **Upload:** Upload a new document to replace the current version of the document in the viewer.
- **Rescan:** Opens the document in the Scan Client. ****Available only for documents that were originally brought into the archive through the Scan Client or Uplink. Must have access to the Scan Client to use this feature.****
- **File Info:** Displays storage information about the document such as Title, Document ID, Storage Date, etc.
- **Place on Hold (or Remove Hold)** Place the document on a Retention Hold (or remove the document from a Retention Hold).
- **Permissions** allows a User to view their Permissions for this document.

The **Filter** allows the user to filter to a particular version by who created the version (“Created By”) or Storage Date.

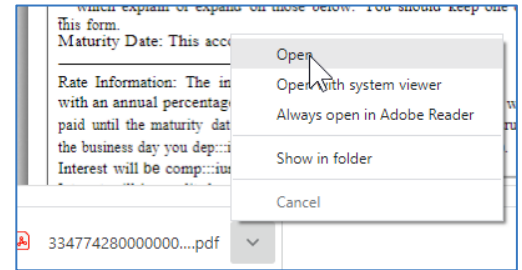

If the document was brought in using Online eSign, the OLE Package Details will be accessible by clicking the **OLE Package ID** link.

Clicking the Download icon to the right will download the document. Document will be in the same file format used to store the document to Identifi.

Version	Created By	Stored	OLE Package ID
1	snolder	9/1/2021	49

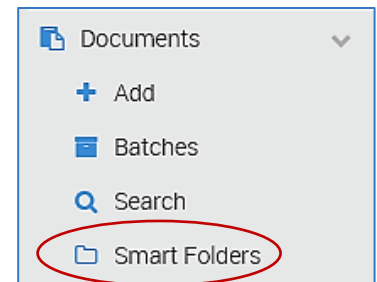

Smart Folders

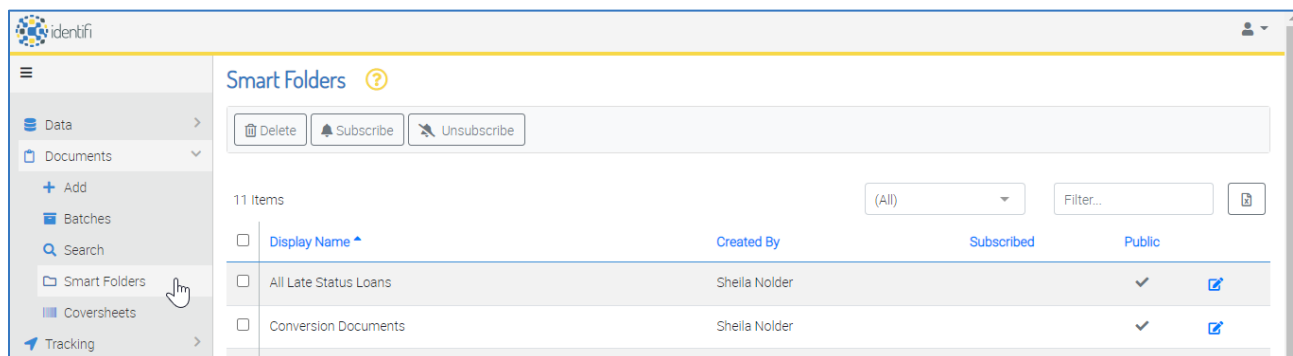

Allows the User to access Smart Folders to launch saved searches.

A Smart Folder is a saved search. Clicking on the title of a Smart Folder will launch the saved search in real time; meaning that anything added to the archive since the creation of the folder will be included in the search results.

Depending on a User's Permissions, both Public and Private Smart Folders may be visible here. If a Smart Folder is Public and the User has access, a check mark will be visible under the "Public" column header.

Any user with the User Role can create a Private Smart Folder (see "[Creating a Smart Folder](#)"). Private Smart Folders cannot be seen by anyone else; they are only visible to the User who created them.

To **Edit** a Smart Folder, the User who created it can click on the Edit icon on the right.

<input type="checkbox"/>	Display Name [▲]	Created By	Subscribed	Public
<input type="checkbox"/>	2021 Customer Documents > 4 pages	Billy Hartman		✓

Barcode Coversheets

Barcode coversheets used in the scanning process are accessed and printed by navigating to *Documents*-> *Coversheets*

Up to three types of coversheets will be available:

- Document Type Coversheets
- Uplink User Coversheets
- Generic Barcode Separator Sheets

User Coversheets

User Coversheets are scanned along with an Uplink batch to identify the User that the batch belongs to in *Batches*. The coversheet does not appear in the batch.

***Note: This tab will appear only on installations licensed for Uplink.**

Scanning Barcode Coversheets

User Coversheet Doc Type Coversheet Breakdoc Coversheet

Generate Barcode Coversheet

2 Users

<input type="checkbox"/>	User Name ^	Login Name	Email	Location	Active
<input type="checkbox"/>	Training User	Tuser	fadams@identifi.net		✓
<input type="checkbox"/>	Training McTrainerson	Training	training@identifi.net		✓

To prepare the coversheets:

1. Check the box next to the user(s) in the list.
2. Click **Generate Barcode Coversheet**
3. The coversheets will open in new browser window as a PDF. From here they can be printed or downloaded.

Generate Barcode Coversheet

3 Users

<input type="checkbox"/>	User Name ^

<input checked="" type="checkbox"/>	Car Loan	

Breakdoc Sheets

Breakdoc Coversheets are generic barcode separator sheets used in scanned batches to indicate where a new document begins during indexing. The barcode will trigger the *This file starts a new document* box to be checked. The coversheet does not appear in the batch.

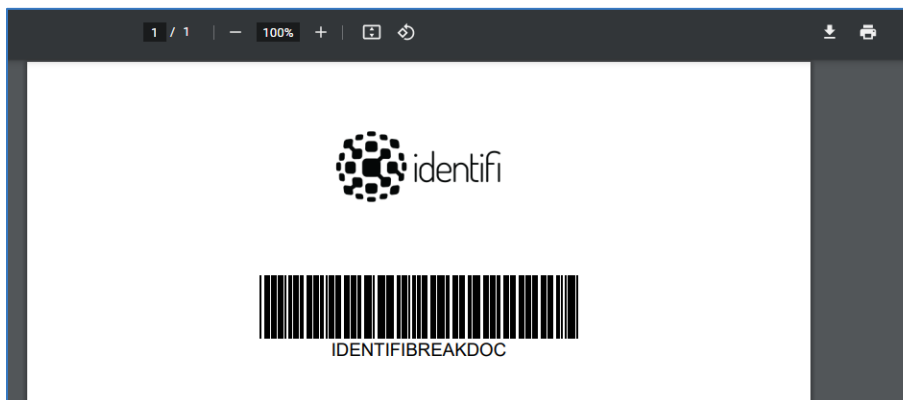

To prepare the coversheets:

1. Click **Generate Barcode Coversheet**

2. The coversheets will open in new browser window as a PDF. From here they can be printed or downloaded.

Viewing COLD Reports & Using Document Text Search

COLD Reports are automatically imported and indexed into Identifi. They are retrievable through the same *Document Search* used to retrieve other types of documents and many of the same search criteria. Unlike other documents stored in the archive, COLD Reports are text indexed. Users are able to search the text within the document from Document Search as well as from inside the Report Viewer.

Viewing COLD Reports

The Report Detail Viewer is very similar to the Document Detail Viewer, however without the 500-page view limitation.

Report Detail Panels:

Click and drag the split screen icon to adjust window size.

Report Detail Panels:

- Document Title Override (optional): CO_DPNEW DEPOSIT NEW ACCOUNTS 2019/01/07
- Document Type: CO_DPNEW
- Report Type: REPORT
- Report Audit: ZZRPT
- Report Post Date: 01/07/2019
- Report Run Date: 01/07/2019
- Report Keyword (3 values): Deposit

The **Report Detail Panels** are the same as the panels found in the [Document Detail Viewer](#). Those most helpful for report viewing are highlighted below:

Index Panel - Displays indexing attribute values for current report. Find details like associated Report Keywords and Report Post Date and Report Run Date.

- **Edit** Allows attribute values to be changed (*permissions required*)

Notes Panel – Users with appropriate permissions can view, add and/or edit notes on the report. Notes are associated with specific pages of the report, and a number in the panel tab indicates the number of notes that exist on the report.

To add a note, click inside the box and type the note. Click the check mark icon to save.

Filter - Allows user to search within notes.

Report Detail Viewer Menu Bar:

The document image can be reviewed on the left.

- **Use the arrows to navigate the pages**

- **Document Text Searching**

- **Zoom in/out**

- **Print as PDF or Download the File**

Downloading COLD Reports

Downloaded reports can be converted to Excel files using the Excel Text Import Wizard.

Download the Report from Identifi:

From Search Results, use the Download icon to download the report (pending permission):

Search Documents ?

KWYK Search... CO_DPNEW

Displaying 100 Documents ([Show Total](#)) Top 100 Documents

<input type="checkbox"/>	Title	Application	Document Type	Pages	File Type	Storage Date	Sync Status	Report Post Date	<input type="button" value="Download"/>
<input type="checkbox"/>	CO_DPNEW DEPOSIT NEW ACCOUNTS 2023/08/03	Insight Reports	CO_DPNEW	6	Report	8/4/2023	Not Synched	8/3/2023	<input type="button" value="Download"/>
<input type="checkbox"/>	CO_DPNEW DEPOSIT NEW ACCOUNTS 2023/08/02	Insight Reports	CO_DPNEW	6	Report	8/3/2023	Not Synched	8/2/2023	<input type="button" value="Download"/>

Alternately, use the Download icon within the Document Detail Viewer:

identifi Document Detail: CO_DPNEW DEPOSIT NEW ACCOUNTS 2023/08/03

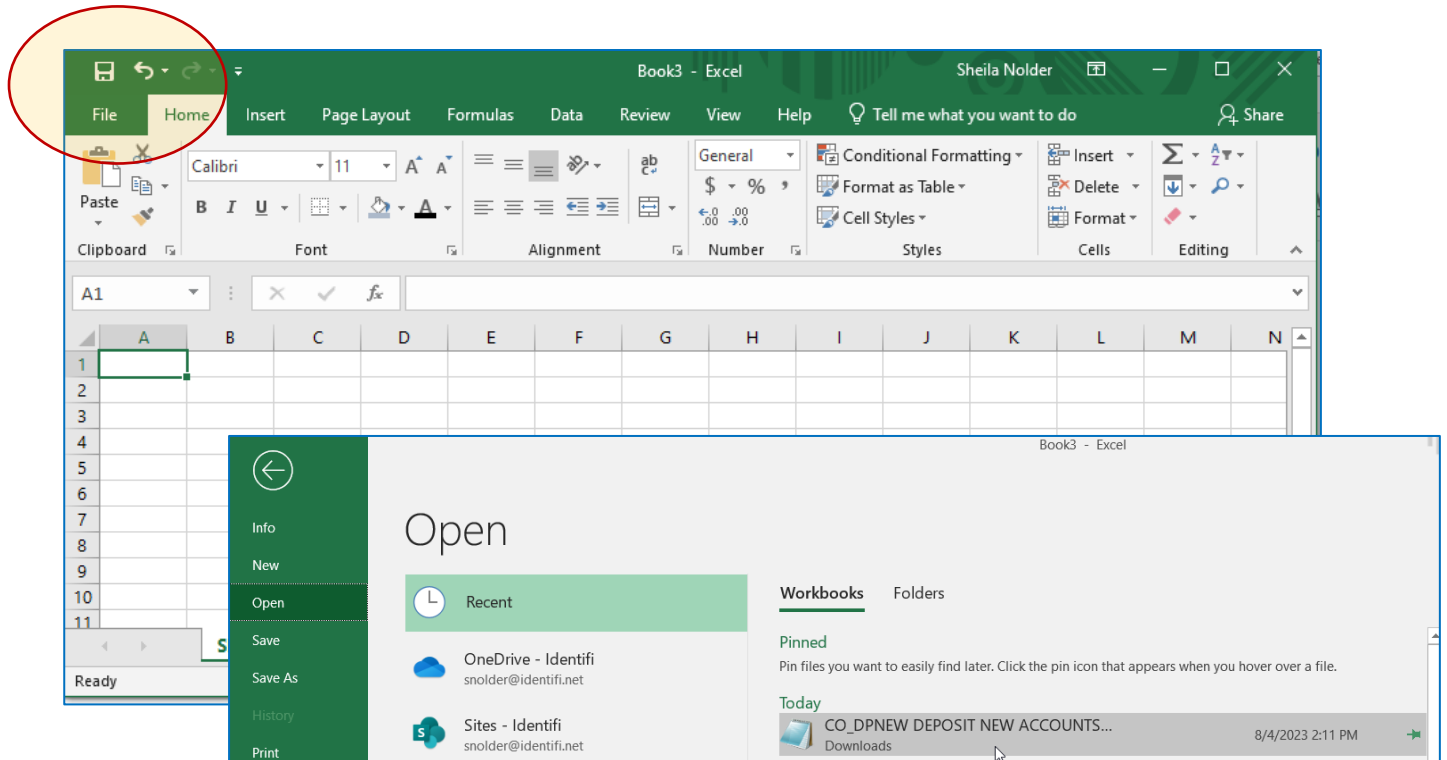

The file will download as a .txt or .prn file.

Name	Type
CO_DPNEW DEPOSIT NEW ACCOUNTS	Text Document
CO_DPNEW DEPOSIT NEW ACCOUNTS	2023_08_03.zip
CO_DPNEW DEPOSIT NEW ACCOUNTS	2023_08_03.prn

Convert the Downloaded document(s) to Excel:

1. Open a blank document in Microsoft Excel. Select **File -> Open** and browse out to open the downloaded file.

2. The **Text Import Wizard** will open:
 - a. At Step 1, click **"Next."**

b. At Step 2, click “Next.” (Do not adjust the columns)

c. At Step 3, click “Finish.” (Do not adjust the columns)

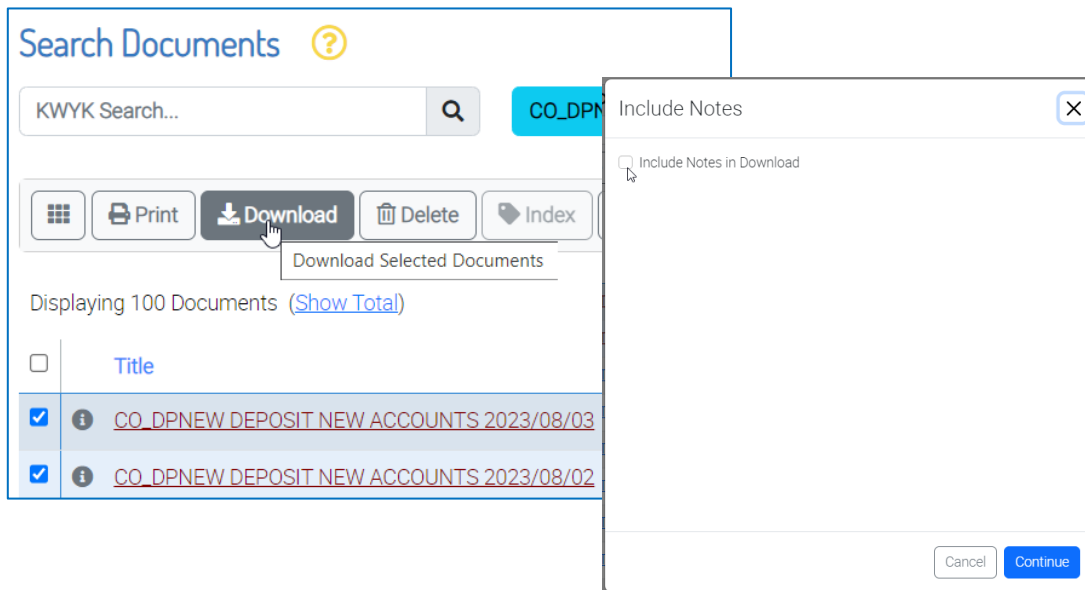

- The document text will be converted into columns, and the document can be adjusted as needed.

Downloading Multiple Reports from Search Results:

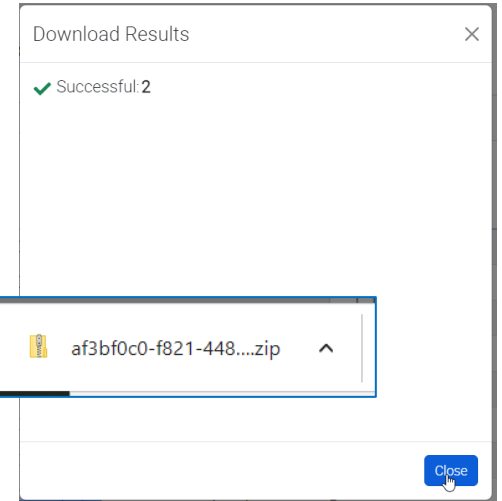

To select multiple reports and mass download selected files into a Zip folder, select the desired reports and use the Download button in the Menu Bar. A prompt will display with the option to include Notes.

A Download Confirmation will be presented; click **“Download.”**

A Zip Folder will be presented, and a **Download Results** window will confirm the number of documents selected.

Use the arrow to select **"Show in Folder,"** or open the Downloads folder from Windows Explorer.

Open the Zip folder to display the selected reports:

Name	Type	Compressed size	Password p...	Size	Ratio	Date modified
CO_DPNEW DEPOSIT NEW ACCOU...	Text Document	2 KB	No	10 KB	87%	8/4/2023 3:02 PM
CO_DPNEW DEPOSIT NEW ACCOU...	Text Document	2 KB	No	10 KB	87%	8/4/2023 3:02 PM

Follow instructions as above from [Step 2](#), opening each document into a separate Excel Workbook or File.

Document Text Searches

The text found within COLD Reports is indexed and searchable. All words in the report, as well as some types of punctuation, are stored during the indexing process. This includes articles and conjunctions (such as *and*, *the*, and *a*), periods (.) and hyphens (-). Commas (,) and apostrophes (') are ignored. So, the number **9,874.56** is stored as **9874.56**; and the name **O'Brien** is stored as **OBrien**. The term **past-due** would be stored as **past-due**.

Document Text Searching from Search Documents

Allows users to retrieve reports from the document image archive that contain specific text/data. Select **Document Text** from the Suggestion Grid.

When the returned reports are opened in the Report Viewer, the **search data will be highlighted.**

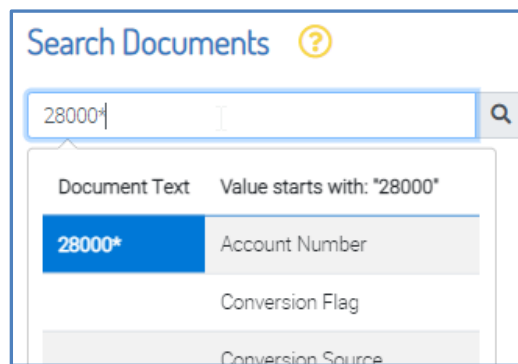

Account Number	Major	Minor	RtxnNbr	Amount	Stat	Time	Description
28000091697	CK	CK02	2531	10,000.00	C	11:26	Deposit
				5,000.00			Cash

Advanced Document Text Search Syntax from Search Documents

Use special syntax to search for text within reports from Search Documents. Select **Document Text** from the Suggestion Grid.

* (asterisk)

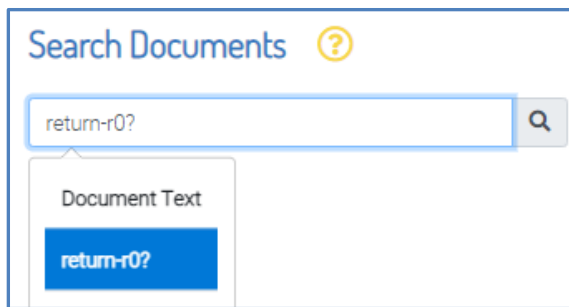

Can only be used in at the end of a term

Wildcard that matches zero or more characters

Example: *28000** would bring back reports with account numbers beginning with those numbers.

? (question mark)

Wildcard that matches exactly one character

Example: *return-r0?* would bring back *Return-R02*, *Return-R08*, etc. as results.

Document Text Search from the Document Detail Viewer using the Search Bar

A Search Bar is available in the Report Viewer. Search for exact words and phrases or use special syntax to search inside a report; 'hits' will be highlighted.

Used to highlight multiple terms in a report.

Example:
ARM and MTG
 would highlight both *ARM* and *MTG*.

Data

Data houses the information used to index documents. All entity items- such as accounts, customers or vendors- can be searched here, pending User Permissions.

Add

Allows the User to manually add an item to an existing Entity.

Click on “Add.” Select the Entity to which the new item will belong.

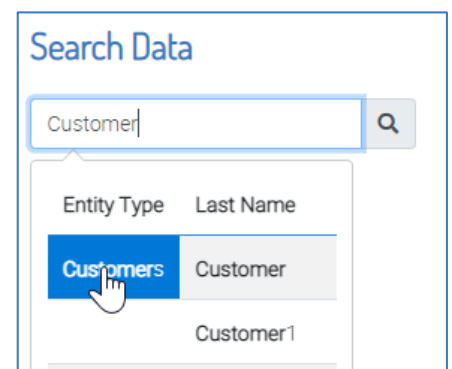

Enter the required information and click “Save” to create the new item.

Search

Data Search allows the User to search within Entity and Workflow Data, and the feature functions like most internet search engines. Once a User begins typing the information about the item sought, the system will begin offering suggestions.

Common searchable attribute values: *Account Number, Customer Name, Employee Code, etc.*

The system automatically searches across all Entities to which the User has permissions and begins suggesting items to narrow the results.

In the example below, the initial search was done for **Customers** (Entity) and the Customer Type **“P”** was added to narrow the results.

Identifi allows search results to be sorted and filtered. The default sort order is Storage Date Descending, reflecting the most recently added items at the top. All underlined columns are sortable and results can be narrowed using the **Filter** field to the right of the screen or by adding another search pill to the search.

<input type="checkbox"/>	-, Sb 0	Customers	7/1/2019	8315	P

Viewing Data Items

Clicking on the entity item in *Data Search* results will open the item’s details. Depending upon the user’s Permissions, tabs related to data details, security, notes, tracking and related documents will be presented. Related entity items may also be viewable.

Data

Contains all information about the item, these details should match the item’s information in the host system. Some fields may be modified by selecting **Edit** or **Delete** in the menu.

Account Detail: 1001451 - Fixed Rate First Mortgage

Account Number *	Account Type *
1001451	Fixed Rate First Mortgage
Major Type *	Minor Type *

Current Balance *	Original Balance *

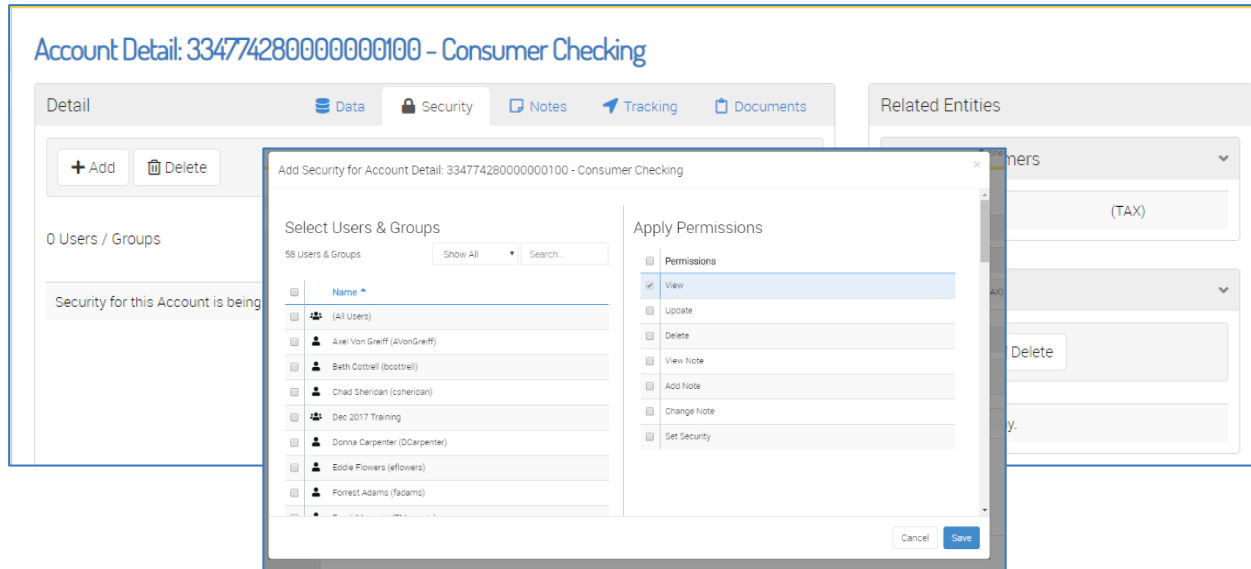

Related Entities

Related Customers

Tqnp, Armand L	TAX
----------------	-----

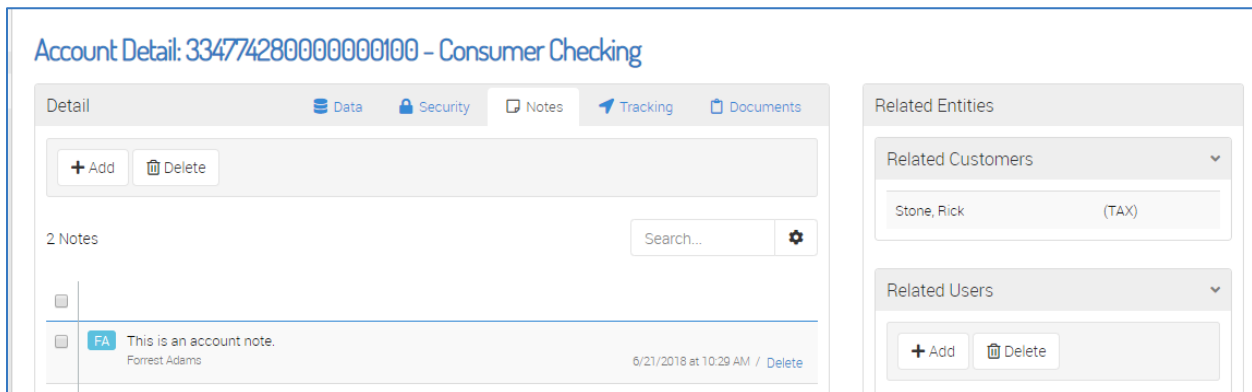

Security

Allows a User to set security specifically for the entity item.

Notes

Notes can be added or deleted here.

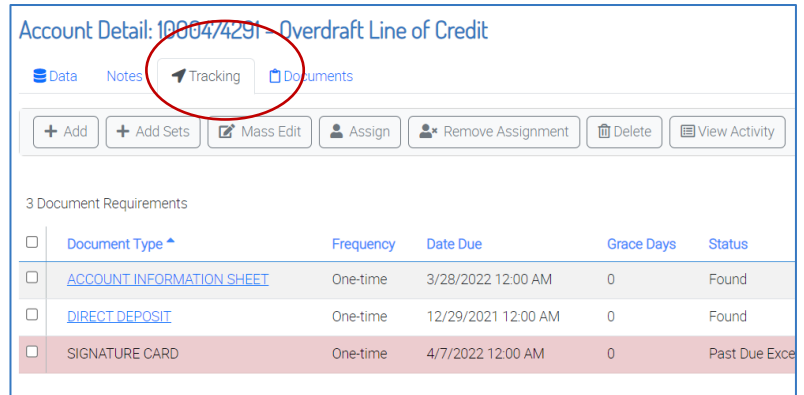

These notes can be previewed from *Data Search* results.

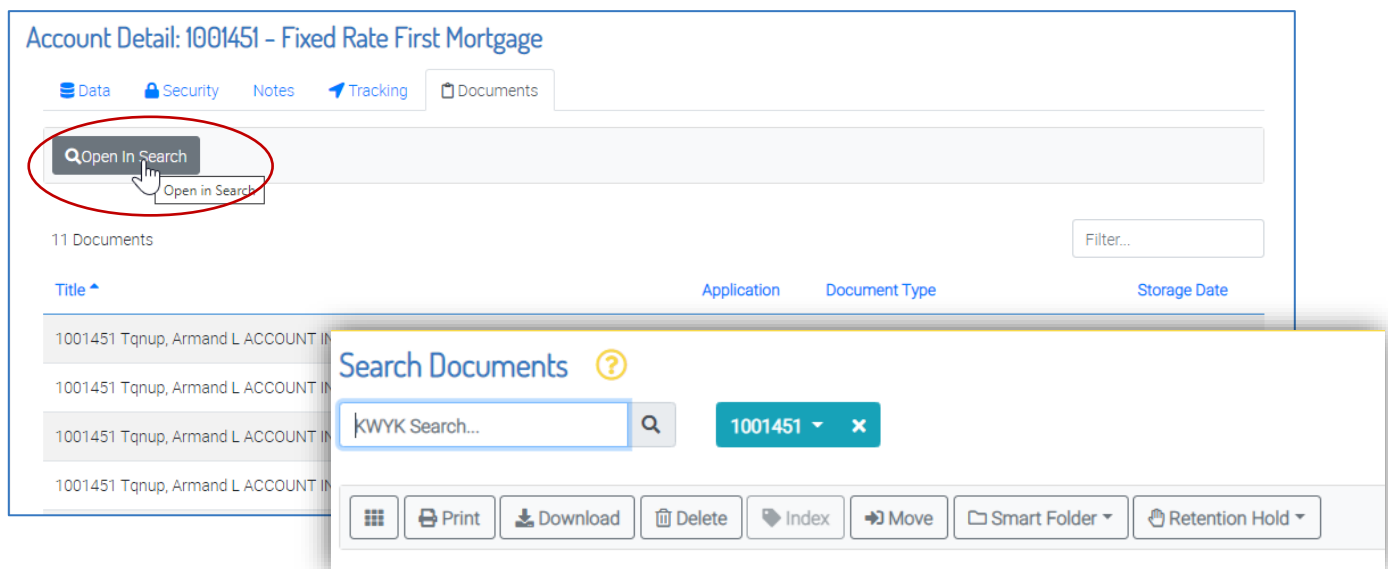

Tracking

This tab will be available only on those installations with the Document Tracking license enabled. For details on this tab, see: [Viewing Tracked Entity Items.](#)

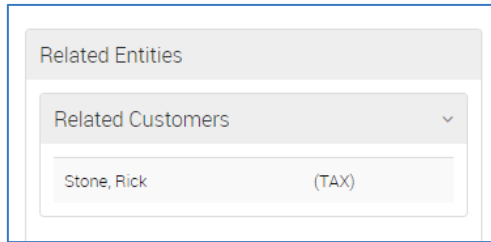

Documents

All stored documents related to the entity item will be listed here. Clicking the title will open the document viewer in a new tab and selecting **Open in Search** will open the list in *Document Search*, providing access to actions like **Print** and **Download**.

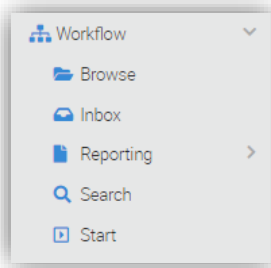

Related Entities

Any related entity items will be found in the right area of the screen. These items are clickable and will open for viewing in the existing tab.

Workflow

Allows the User to initiate a workflow process and to track work items or tasks within a workflow.

Browse

A User is able to browse by Plan to locate specific Work items.
Users will see only those Plans to which they have been assigned.

When browsing within a plan, Work items can be **assigned, reassigned, prioritized** or **terminated, Reactivated** and **emailed steps can be resent** (Manage Permission required).

Within the Browse By Plan results:

- Work items that have been placed **On Hold** will have a badge displaying that status.

ID	Priority	Name	User	Last Activity

10027	Normal	1515-Jack Frost Escalated	Review	FA Test	3/25/2019 5:04 PM

Three tabs are displayed:

- **Available** – Unassigned items to be completed are displayed here. Once an item is selected from Available by a User, it will then be assigned to them.
- **My Items** – (Default tab) Displays items assigned to the User and requiring attention or action.
- **On Hold** – Displays items put on hold by the User for follow up at a later time
 - Items in this tab are not accessible to others and only the User who placed the item on hold will be able to remove the hold.

The number on each tab is a tally of the items within that tab.

Item Badges and Labels in the Inbox:

An alert message is displayed when a User has hit the limit of items returned for the Workflow Inbox.

- Returned-** Items that appear in the User's inbox as the result of a 'Return to Sender' action.
 
- Escalated-** Items that have remained in a step beyond the configured amount of time. Escalation may trigger only a reminder email, or it may move the item to a different step for attention.
 
- OLE Package Statuses-** For installations with Online eSign enabled, the Inbox will reflect badges which display the status of an OLE Package (Review, Pending, Completed).

Taking Action on an Item from the Inbox

Within the **My Items** tab, open a single item by clicking on the title of the item to be reviewed from the list displayed.

Sheila's Inbox ?

Open

Available My Items 2 On Hold

Filter...

ID	Priority	Name	Step	Plan	Last Activity
938969	Low	05231947 - Fixed Rate Second Mortgage	Second Review	Forrest's Plan	5/31/2022 5:18 PM
100739	Normal	XYZ1234-	User Step	Clayton's Rockin' Plan	9/8/2021 12:45 PM

Open multiple items to review by clicking the items' checkboxes and selecting the "Open" icon. The item(s) will open and the step name will be displayed in the upper left corner of the screen.

Sheila's Inbox ?

Open
Open selected work items

Available My Items 2 On Hold

Filter...

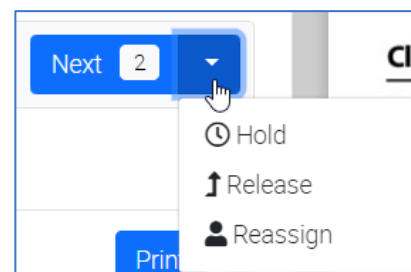

ID	Priority	Name	Step	Plan	Last Activity
938969	Low	05231947 - Fixed Rate Second Mortgage	Second Review	Forrest's Plan	5/31/2022 5:18 PM
100739	Normal	XYZ1234-	User Step	Clayton's Rockin' Plan	9/8/2021 12:45 PM

Move between Work items using the Next button to the right of the screen. The number to the right indicates the number of items remaining.

The drop-down arrow to the right reveals additional options:

- **Hold** - places the item on hold moves it to the "On Hold" tab in the User's Inbox. (Note: When an item is placed on hold, it is inaccessible to others, and only the User who placed the item on hold will be able to remove the hold.) See [more](#).
- **Release** - remove the assignment and returns the item to the "Available" in any User's Inbox with permissions to the Step.
- **Reassign** - sends the item to another User's Work Inbox to be addressed.

The Form (where information is presented and collected for the step) will be viewable in the left pane.

Sale Price: 1,800,000		
Loan Terms	Can this amount increase after closing?	
Loan Amount: \$162,000	NO	
Interest Rate: 3.875%	NO	
Monthly Principal & Interest: \$761.78	NO	
See Projected Payments below for your Estimated Total Monthly Payment.		
Prepayment Penalty	Does the loan have these features?	
	YES - As high as \$3,240 if you pay off the loan during the first 2 years.	

Instructions Bar

Within the open item, the instructions bar will be visible at the top of the screen and contains a description of what actions need to be taken as part of this work item.

In the example below, the User is directed send the documents for signature to move the item to the next step in the workflow process.

Each workflow item will have a unique action buttons. Examples might be: approve, reject, return, question, reply, etc.

Once instructions are no longer needed, they can be hidden by clicking on the “X” to the far right of the bar.

Note: Clicking “Instructions” within the Close Drop-down will reopen the Instructions bar.

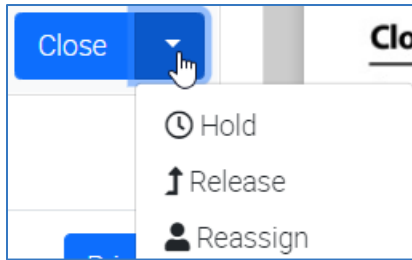

Actions will move the item to the next step in the workflow, return the item to its sender and/or automatically create and store a PDF of the work item’s Form in the Identifi archive.

When an item is returned, a dialog box will pop up, prompting for a comment on the returned item (required). The item is returned to the previous User who touched the item, and it will be listed in their Inbox under the “My Items” tab.

ID	Priority	Name	Step
579246	Normal	000111222 - Returned	Return

Some Actions may trigger emails, SMS messages or send web forms to be completed by a customer or other external participant.

Close/Hold/Release/Reassign

Clicking the **“Close”** icon will close the work item, returning it to the User’s Inbox.

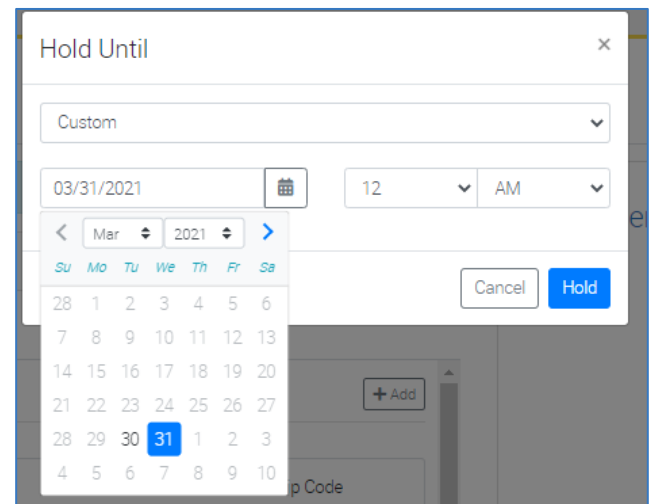

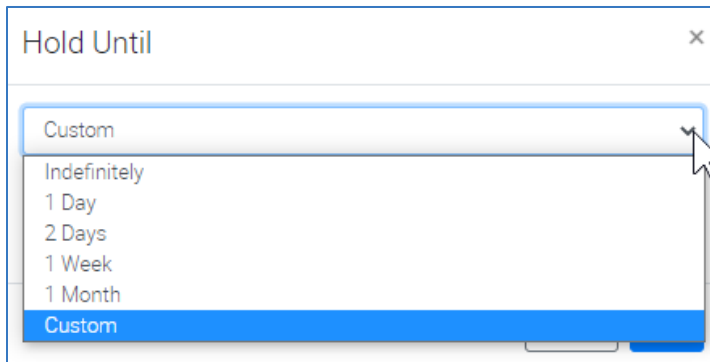

Clicking the **“Hold”** icon will place the item on hold and will move it to the “On Hold” tab in the User’s Inbox. When an item is placed on hold, it is inaccessible to others, and only the User who placed the item on hold will be able to remove the hold.)

When placing an item On Hold, the User will have the opportunity to set a time period for the item to remain in On Hold status.

Choose from among the set periods or add select *custom* to choose a specific date and time.

 Release

Clicking the **“Release”** icon will remove the assignment. The item will then appear in the “Available” in any User’s Inbox with rights to the Step.

 Reassign

Clicking the **“Reassign”** button will allow the User to reassign the Work item to another User.

The image shows two overlapping 'Reassign' dialog boxes. The background dialog box has a search bar containing 'sh' and a list of users: Chad Sheridan (csheridan) and Sheila Nolder (snolder). A mouse cursor is pointing at Sheila Nolder. The foreground dialog box shows the same search bar with 'snolder' entered, and the user list is collapsed. The 'Reassign' button is highlighted with a mouse cursor.

The Form Tab

The Form will be visible beneath the “Form” tab (**Note:** In some cases, the Form Tab will not be displayed.):

When the plan is created, the design of the Form(s) is based on the Entity attributes. Some fields may be pre-filled while other fields may require manual entry or offer a drop-down menu.

Fields marked with a red asterisk (*) are required fields.

Wait

If specific documents are required to move this item to the next step in the Workflow process, clicking on the **"Wait"** icon will allow the User to add the specific document type to a wait list from a pre-configured drop-down menu. (**Note:** *Not all items will have this option*)

Select the document(s) required by clicking the plus icon. 

Once all document(s) have been selected, clicking the "X" in the top right corner will close the selection window.

The documents will now be listed as "Waiting" under the Documents tab.

To remove the requirement, click on the "X" to the right.

Sign

Selecting the "Sign" option will create an Online eSign Package to send documents necessary for signature to the Customer for execution. (**Note:** *Not all items will have this option*)

 A screenshot of the main application interface. At the top, it says 'Work Item: 89845 - 1005161 - Fixed Rate First Mortgage' and 'Assigned To: Sheila Nolder Step: Create Package'. Below this is a light blue bar with the text 'Send documents for signature.' and an 'X' icon. There are buttons for 'Package Cancelled', 'Package Sent', 'Return', and 'Close'. A navigation bar shows 'Form', 'Documents' (with a '1' badge), 'Notes', 'Signing Packages' (with a '1' badge), and 'Activity'. Below the navigation bar is a list of documents. One document, 'Mortgage Loan' (1005161 Mortgage Loan), is listed. To the right of this document is a 'Sign' button, which is circled in red. A tooltip 'Create Signing Package' is visible over the 'Sign' button. On the right side of the screen, there is a 'Closing Information' sidebar with various fields like 'Date Issued', 'Closing Date', etc.

An Online eSign Package form will open with the Profile selected and Package Name field populated with the Work Item name:

Complete all Package Settings on the form in order to complete the Online eSign Package for sending. For additional information, see [Package Settings](#).

Signing Packages Tab:

This tab is only displayed on steps with Online Signing enabled. Here, any Packages available for signing are displayed. Clicking on the item will open the Package in Online eSign.

2583	1005161 - Fixed Rate First Mortgage	Sharon Noeba	Completed	Mortgage	8/23/2022 3:21 PM	

Status Descriptions:

Sent- the Package has been sent, but the documents have not been signed. Clicking the Package will open the Package Settings where a reminder can be sent to the recipients. For more information on managing Sent Packages, see [Managing In Process Packages](#)

Completed- all documents in the Package have been signed by all Recipients and they have been archived.

*Note: Packages was sent with "Review before completion" checked will appear here in **Sent** status even after all signatures have been collected until it's reviewed. For details on that process, see [Ready For Completion Packages](#)*

Notes Tab:

Here, the User is able to view notes that have been added during the item's workflow and to enter additional notes (with Permissions).

After typing in the note and clicking the check mark, the note will be displayed and is date/time stamped.

The screenshot shows the Identifi interface for a work item titled "Work Item: 89845 - 1005161 - Fixed Rate First Mortgage". The interface includes a navigation bar with the Identifi logo and the text "Assigned To: Sheila Nolder Step: Create Package". Below this is a light blue notification box that says "Send documents for signature." with a close button. A row of action buttons includes "Package Cancelled", "Package Sent", "Return", and "Close". A navigation menu contains "Form", "Documents" (with a count of 1), "Notes" (with a count of 1 and a mouse cursor), "Signing Packages" (with a count of 1), and "Activity". A "Filter..." input field is present. At the bottom, there is a text input field with the placeholder "Type a note here..." and a checkmark button.

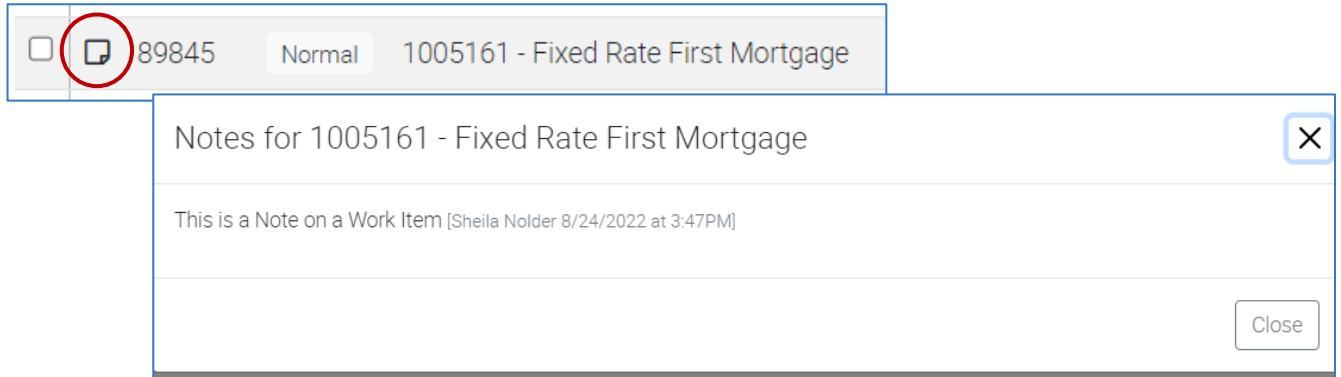

This close-up shows the bottom right corner of the note input area. It features a text input field containing the text "This is a Note on a Work Item". To the right of the input field is a checkmark button. A tooltip labeled "Add Note" is visible over the checkmark button.

Selecting the Trash Can icon to the right will remove the note from the workflow item.
 Notes placed on work items will be visible from the User's Inbox

From the User's Inbox, clicking the note icon will open the note for viewing:

Viewing Documents

Documents within a work item are listed under the “Documents” tab once the item has been opened:

Clicking the document title will load the document in the Document Pane to the right of the form.

To open the document in a new tab within the Document Viewer, click the icon to the right of the Document Title

On the left is the document image; on the right are the Document Detail Panels.

For additional information about viewing documents, see [Viewing Documents in the Document Detail Viewer](#).

Workflow-Reporting

Completed Steps Report:

Allows the user to report on Work Items that have gone through the completion of a step.

The screenshot shows the 'Completed Steps' configuration panel. It includes a 'Criteria' section with 'Add Criteria', 'Submit', and 'Reset' buttons. Below are several filter fields: 'Work Item Status Type' (set to 'Active Work Items'), 'Completed Step Date' (radio buttons for 'Predefined' and 'Custom', with 'Predefined' selected and a dropdown showing 'Current Month'), 'Workflow Plan *' (dropdown for 'Select Workflow Plan ...'), 'Completed Workflow Steps' (dropdown for 'Select Optional Workflow Steps ...'), 'Actions Taken' (dropdown for 'Select Optional Actions Taken ...'), 'Actioned By Users' (dropdown for 'Select Optional Actioned By Users ...'), and 'Group By' (dropdown for 'None').

Criteria:

Work Item Status Type:

Choose from **All**, **Active** or **Inactive** Work Items.

The screenshot shows a dropdown menu for 'Work Item Status Type'. The options are 'Active Work Items', 'All Work Items', 'Active Work Items', and 'Inactive Work Items'. The 'Active Work Items' option is currently selected and highlighted.

Completed Step Date

Choose between a Predefined or Custom Date Range. This field represents the date in which a work item completed/exited the workflow step.

Two screenshots illustrate the 'Completed Step Date' configuration. The left screenshot shows the 'Predefined' radio button selected, with a dropdown menu listing various time periods: 'Current Month', 'Last Month', 'Last Quarter', 'Last 7 Days', 'Last 30 Days', 'Last 60 Days', 'Last 90 Days', 'Last 120 Days', 'Last 360 Days', 'Current Year (YTD)', and 'Previous Year'. The right screenshot shows the 'Custom' radio button selected, with two date input fields: '06/01/2023' and '06/30/2023', each with a calendar icon.

Workflow Plan: (*Required)

Select the Workflow Plan to report on. Users can report on one plan at a time, because of the ability to add custom attributes to the report criteria.

The screenshot shows a dropdown menu for 'Workflow Plan *'. The options are 'AD Change [Technology] (offline)', 'Customer Maintenance [Customer Maintenance]', and 'Documentation Plan [Account]'. The 'AD Change [Technology] (offline)' option is currently selected.

Completed Workflow Steps:

Optionally select one or more Completed Steps from the drop-down list. Leaving blank will include all Steps in report results.

Actions Taken:

Optionally select one or more Actions Taken from the drop-down list. Leaving blank will include all Actions Taken in report results.

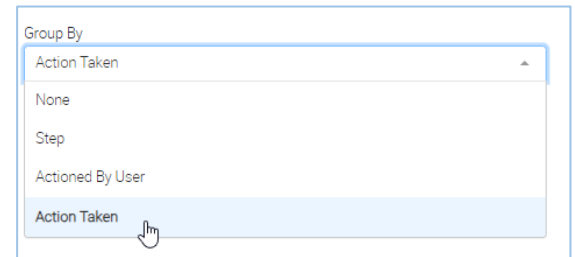

Actioned By Users

Optionally select Actioned By User(s) from the drop-down list. Leaving blank will include all Users in report results.

Group By:

Optionally select the preferred grouping for results display. The default is no grouping.

Add Criteria:

Add any additionally-available criteria using the button at the top of the page.

The selected criteria will appear at the bottom of the form. You can delete any added criteria using the trash can icon to the right. Currently only string attributes are available for report filtering.

Click Submit to generate report results. Results will be displayed in a separate tab.
Click Reset to clear the form.

ID ▾	Work Item Name	Step	Assigned User	Initiated
------	----------------	------	---------------	-----------

- Click the Work Item Name to view the item's details (opens in new tab).

 A screenshot showing a table with columns "ID" and "Work Item Name". The row with ID "10088" and name "6267894-Jeff Buckley" is highlighted. A modal window is open over this row, displaying the details for "Work Item: 10088 - 6267894-Jeff Buckley". The modal includes a "Close" button, tabs for "Form", "Notes", and "Activity", and a "Print" button. The "Form" tab is active, showing fields for "Employee Name", "Tax ID Number", and "Date of Birth".

Workflow-Search

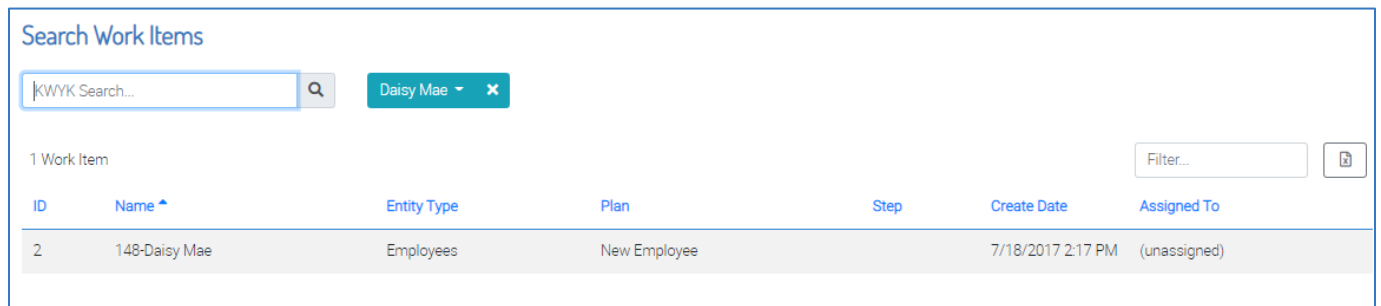

Search within Work Items by clicking on “Workflow” then “Search” from the left menu bar.

The Search Work Items screen will open:

Within the Search box, type in a searchable attribute, such as *Invoice Number, Amount, Employee Name*, etc. This feature works in the same way as Document Search and Data Search and will offer a “suggestion grid” of possible matches.

Clicking on the desired selection (*in this example, “Daisy Mae”*) will pull back search results.

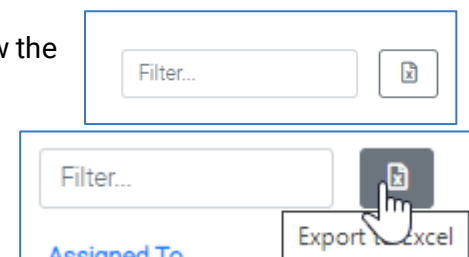

The Search feature allows search results to be sorted and filtered. The default sort order of items has been changed to Create Date Descending, reflecting the most recently added items at the top. All underlined columns are clickable and will sort the results by the column selected.

If a large number of results is displayed, search results can be filtered further by adding another search “pill,” thus narrowing the results to include the new criteria.

The Search Filter box to the right of the screen can also be used to narrow the search within existing results.

Clicking on the icon to the right of the Search Filter box allows the User to **Export to Excel**. A CSV file containing the search results will open in Excel and can be edited, saved, etc. as needed.

Open the Item for viewing by double clicking on the Name:

Search Work Items

Desktop eSign

Desktop eSign allows for electronic signature and automatic archival of documents. Documents can be signed by multiple parties or placed on hold to be signed at a later date or at another location.

Signing Documents

Open the documents and print as normal. Those requiring electronic signature will be directed to Desktop eSign and the remainder of the documents will be sent to the paper printer (this is configurable).

Once Desktop eSign has launched:

Select Form Set

Formsets
The formset could not automatically be determined. Select the set of forms to use when recognizing the pages in the document package.

Form Group:
Demo

Form Set:
Deposits

Signers
Set the Signer Count for each Signer Type.

Signer Type	Signer Count
Authorized Signer	0
Bank Employee	0
Signer	0

OK Cancel

1. Select the correct **Form Group** and **Form Set** (often there will be only one of each, so users will not need to make a selection).
2. Enter the number of “*signers*” in each category and click **OK**. The documents will be loaded and ready for review and signing.

Note: If the installation has been enabled to use both Desktop eSign and Online eSign to execute packages, the prompt will display two columns to define the number of signers for each type of signature (Figure 1).

A second dialog box will open to complete the fields needed for the Online eSign Package (Figure 2).

Select Form Set

Signers
Set the Signer Count for each Signer Type.

Signer Type	In Person Signers	Remote Signers
Primary	1	1

OK Cancel

(Figure 1)

Remote Signers

Enter the remote signers information

Type	Number	First Name	Last Name	Email
Primary	2			

OK Cancel

(Figure 2)

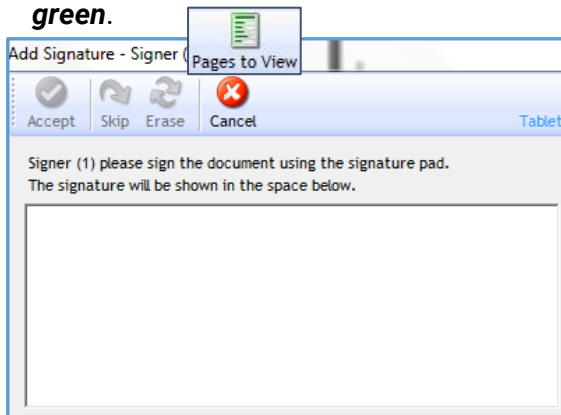

Note: Once the package has launched, check the bottom menu to ensure that the forms have been recognized. If not, do not continue with the Desktop eSign process. Use the Print button to print out the document for wet signing (see [Printing Package Documents](#)), and take note of the form's name to let your administrator know of the issue.

Document Signing Menu

Desktop eSign may be configured so each form page must be viewed before the user is allowed to begin signing. Users can navigate using the **Next** and **Previous** buttons in the upper menu bar. Once all of the pages have been reviewed, the **Pages to View** icon changes from **red**  to **green**.

To sign the documents, users may review the pages and double-click the signing areas to launch the signing boxes. Use the mouse to click in the white signing area and sign on the tablet.

Alternatively, the  button can be used to launch the *Signing Wizard*. This will automatically move from one signature area to the next, one signer at a time, skipping the pages that do not have a signature box.

For example, all signing areas required for *Signer 1* throughout the document will open, followed by all the areas required for *Signer 2*.

- Signing areas appear **Red** until signed or skipped.

- If the customer wishes to re-do their signature, select **Erase**.

- Signing the box and clicking **Accept** will cause the signing area to appear **Green**

- Using **Skip** causes the signature area to appear **Yellow**.

Use the Skip feature if the signature is not needed, or if the package will be put **On Hold** for additional signers to complete the package later.

- Using the **Cancel** button will close the signing area and it will remain **Red**

Note: To undo (or redo) an accepted signature, simply click the green signature box, select “Yes” to confirm, and re-sign.

Free Form

Free Form can be used to add Signature areas for additional signers, add initials or mark up the documents.

To use the Free Form function, click the **Free Form** button in the toolbar. Place the **+** cursor in the area to draw the signature box, hold down the left mouse button and drag down and to the right to draw the signature area.

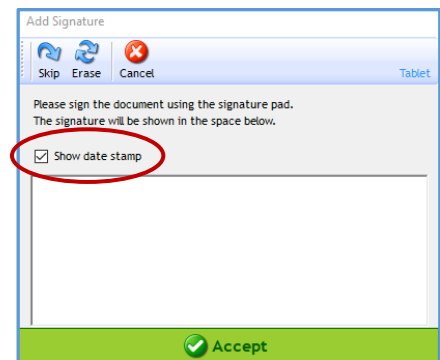

When the left mouse button is released, the signature box area will be outlined and the signature pad prompt will appear.

Note: The Free Form signature box has the option to date stamp the signature.

To turn on the stamp, place a check in the box next to “Show Date Stamp.”

The next time the Free Form feature is used within the signing session, Desktop eSign will remember the User’s preference.

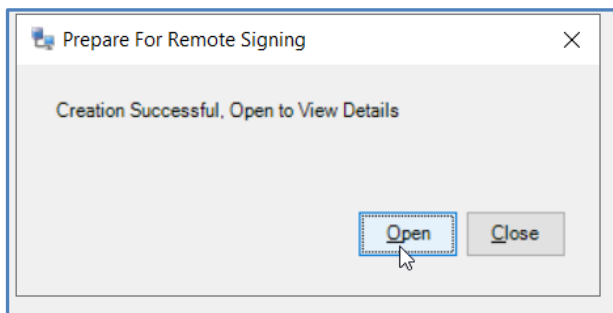

Completing Documents

Once all pages have been viewed and all signature areas have been addressed (either signed or skipped), the package is ready to **Complete**. Once the Complete button in the upper menu is clicked, the archiving process begins and the signed documents are sent to the document archive. A copy of the forms will also print at this time for the customer if configured to do so.

If additional remote signers have been configured for the package (See [Note](#) under Signing Documents), clicking **Complete** will prompt to open the Workflow Item to continue configuring the package for remote signatures.

- Select **“Open”** to open the Workflow Item and continue to the Online eSign Designer.

- Select **“Close”** to close the package. It will be available in the Workflow Inbox, the Online eSign Inbox and can be found using Desktop eSign Package Search.

Placing Document Packages On Hold

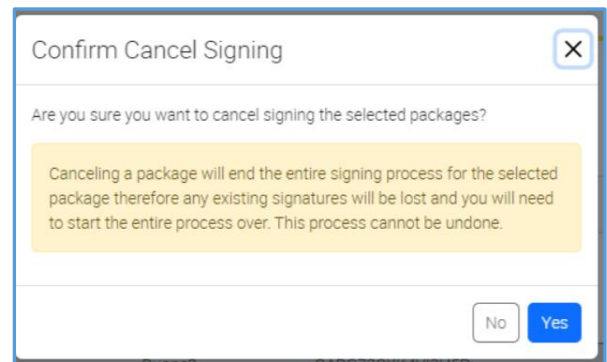

eSigned documents can be placed On Hold to be completed at a later time or from another location.

Begin the process by printing the forms to Desktop eSign as outlined above. Use the Skip feature for all signature areas that will not be signed in this session and select **Hold** from the upper menu bar.

Canceling a Package

To cancel signing the Package, click the red “X” at the top right of the page. A prompt will present to Confirm Cancel Signing. Click **Yes**.

Retrieving On Hold Packages

On Hold packages, as well as those awaiting Online eSign signatures, may be retrieved from My Packages or eSign Search in the left menu.

My Packages

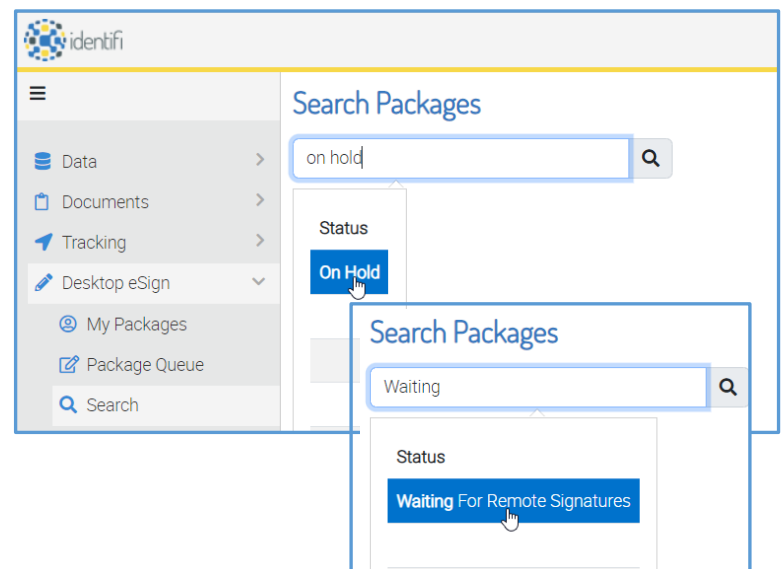

In **My Packages**, users will find any packages that they have placed On Hold themselves or that are awaiting remote signature in Online eSign.

Desktop eSign Search

Search for packages stored by another user with a combination of criteria such as:

- Account number or tax ID
- User ID for the user who created the package (or who last placed it On Hold)
- The unique Receipt Number assigned to the package
- Storage Date
- On Hold status
- Waiting for Remote Signatures status

The default sort order of package results is Storage Date Descending, reflecting the most recently added packages at the top.

Once the package is located from *My Packages* or *Search*, click on the **Continue Signing** link to launch the Desktop eSign Client and complete the signing, or click on the **Open OLE Package** link to complete the Online eSign process.

<input type="checkbox"/>	Title	Status	Form Set	Receipt Number	Stored By	Storage Date	
<input type="checkbox"/>	Untitled	Waiting For Remote Signatures	Duane2	BAFG7DRAYSTN4HQP	tloikus3	6/15/2023 2:26 PM	Open OLE Package

<input type="checkbox"/>	Title	Status	Form Set	Receipt Number	Stored By	Storage Date	
<input type="checkbox"/>	Untitled	On Hold	Duane2	RAGGPFUV6348XHYP	tloikus	6/8/2023 1:42 PM	Continue Signing

Printing Package Documents

Any forms a customer would normally take with them (such as disclosures), can be configured in Desktop eSign to automatically print in hard copy.

For unplanned situations where a printed copy of the document is needed, such as to send a copy with the customer or to wet-sign the document, the unsigned form can be printed using the **Print** button in the upper menu bar of the Desktop eSign Client.

Retrieval of Signed Document Images

Immediately upon completion of the package, the signed documents are archived to Documents can be retrieved through **Document Search** by criteria such as the account number or customer's identification. Following an overnight sync process, the documents will also be retrievable by all related attributes.

A suggested practice is to create a Public Smart Folder to 'catch' all recently stored Desktop eSign documents, making it easy to locate that day's electronically signed documents.

*Search criteria for the Smart Folder should include **eSign (Source)** and **Y (Indexing Required)***

Review of Completed eSign Packages

All completed Desktop eSign packages are retrievable through Desktop eSign Search.

Search for packages stored by another user with a combination of criteria such as:

- Account number or tax ID
- User ID for the user who created the package
- The package's unique Receipt Number
- Storage Date
- Complete status

Click on the package Title to open the **Package Detail**.

✓ **Filter** results using the *Filter* box.

✓ **Export** the results to Excel using by clicking

Sheila's Online eSign Inbox ?

[New Package](#) [Archive](#)

2 Items Filter...

ID	Name	Recipients	Status	Profile	Last Updated	Expiration Date	Provider
2623	Account Documents	Mary Snow	Draft	Accounts	12/15/2022 2:59 PM		Cloud
2622	Address Change Form	Mary Snow	Sent	Car Loan	12/15/2022 12:29 PM		Cloud

- ✓ **Archive** packages with the status of **Completed** or **Declined** by clicking the box on the left

and selecting  in the upper menu. Archived packages will no longer show in the Inbox, but the documents associated with them can be retrieved through Documents Search and the Package details can be reviewed through [Online eSign Search](#)

The screenshot shows the 'Sheila's Online eSign Inbox' interface. At the top, there are two buttons: 'New Package' and 'Archive'. A tooltip for the 'Archive' button reads 'Removes packages out of your inbox.' Below the buttons is a table with 4 items. The table has columns for ID, Name, Recipients, Status, Profile, Last Updated, Expiration Date, and Provider. The second row is selected, showing ID 2625, Name 'Account Documents', Recipient 'Cindy Rella', and Status 'Completed'. A modal dialog box titled 'Archive Packages' is open, asking 'Are you sure you want to archive the selected packages? They will still be searchable, but will no longer appear in your Inbox.' with 'Cancel' and 'Archive' buttons.

Archived packages may be restored to the User's Online Inbox by selecting the "Restore" button within the package details.

- From Online eSign Search Results, double-click the Name of the package to be restored to open Package Details.
- Within the Package Details, click the "Restore" button to return the item to the Online eSign Inbox.

The screenshot shows 'Online eSign Search Results' with a 'Reassign' button at the top. Below, it indicates '1 Package' and shows a table with columns for ID and Name. The first row has ID 2625 and Name 'Account Documents'. A mouse cursor is hovering over the name.

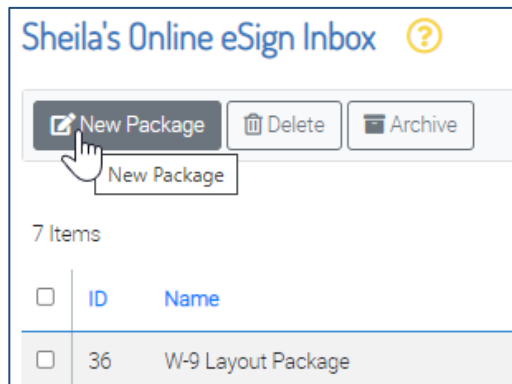

The screenshot shows the 'Online eSign Package' details page. At the top right, there are buttons for 'Restore', 'Consent', and 'Evidence'. The 'Restore' button has a tooltip that says 'Restore'. Below the buttons is the 'Package Settings' section, which includes a 'Profile' dropdown menu set to 'Accounts', and 'Name' and 'Description' input fields. The 'Name' field contains 'Account Documents'.

Package Inbox Statuses

- **Draft:** Packages that have been created but not Sent to Sign. Opening the Package Details allows the user to make changes to Documents and Recipients, as well as open the documents in the Designer to add/modify Signature fields.
- **Sent:** Packages that have been Sent to Sign, but not all Recipients have signed. Opening the Package Details allows the user to see who has signed and to send Reminders to those that have not. See [Managing In Process Transactions](#) for more information.
- **Declined:** This status is reflected when a Recipient declines electronically signing the document. The package will remain in the User's Inbox until archived.
- **Ready for Completion:** Packages that were set to *Review before completion* or included Attachments.
- **Signed (Index Documents):** Packages that have been Signed, any Attachments approved and, if necessary, Reviewed for Completion. Clicking **Index Documents** opens the Package in Batch Indexing. For details on the Indexing process, see [Batches](#).
- **Expired:** Packages that have not been signed by the set Expiration. Opening the Package Details allows the user to adjust the Expiration and then resend the documents.

Opening Package Details allows the user to download the signed documents and attachments for review. For more details see [Ready For Completion Packages](#)
- **Completed:** Packages that have been signed and indexed. The documents, along with the Evidence Summary and Consent Form, are now retrievable through Documents Search. These Packages will remain in the Inbox until *Archived*.

Creating a New Package

Create New Packages from the Inbox.

Click **New Package** in the upper menu, then enter the Package's details, including documents and signers.

Package Settings

Fields marked with an * asterisk are required.

- **Profile:** Select the appropriate Profile for the package.
 - Profiles determine what Application and Document Types will be associated with the signed documents for indexing purposes.
 - A Profile will also have default Security and Authentication settings
 - Profiles are unique to an Identifi installation
- **Name:** The Name entered here determines how the Package appears in the Inbox, the Recipient's email and Batch Indexing.
- **Description:** The Description is visible when viewing the Package details.
- **Message:** The Message entered here is included in the email sent to all Recipients.

- **Review before completion:** With this box checked, the Package will return to the Inbox, after all Recipients have signed, with a status of "Ready for Completion". The documents and Attachments can then be reviewed by the Sender.
- **Expiration:** (optional) With an expiration in place, the link to sign the documents will only remain active for that period.
 - A specific date can be chosen, **or**
 - A specific number of days can be set

Date

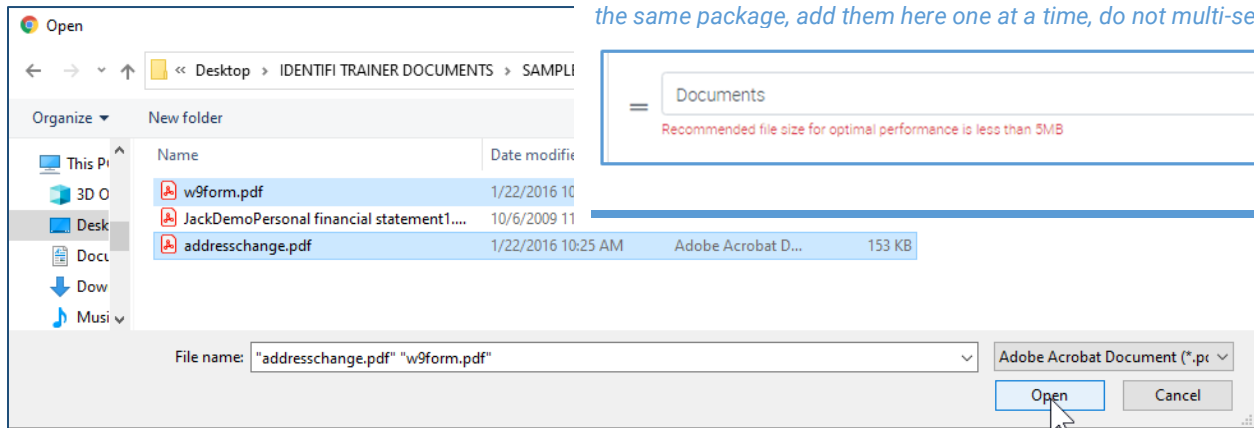

Day(s)

Documents

Click **"+Add"** to open Windows Explorer and choose one or more documents to be sent for signing.

NOTE: For best results, documents should not be greater than 5 MB, though the limit is 16 MB. If multiple large documents must be sent from the same package, add them here one at a time, do not multi-select.

The name of the document(s) is/are customizable.

- The Document Type is a required field and is pre-selected from a drop-down for indexing. Document Types presented are based on the Application associated with the Profile selected.
- **If the Document Type is in more than one Application, choose the Application.**
- Repeat until all documents have been added to the Package.
- The eSign Disclosure is included in every Package automatically, so it does not need to be added here.

Recipients

Click **+Add** to add the Signer(s).

- Enter the First and Last Names and Email Address of the Signers. Optionally, enter Title and Company details.
- Recipients that have previously been sent Packages to sign will be “remembered” and be added with a single click.

- **Reviewer Recipients:** A Recipient added here that does not need to sign the document will receive the package as a “Reviewer”. Follow all steps for adding them as a Recipient, but do not create a Signature area for them on the document.
- Select the *Authentication* method, if overriding the default (see [here](#) for details)

- **Enforce signing order:** All Recipients will receive the Package at the same time unless this is selected.

Reorder Recipients by clicking  and dragging the symbol up or down to set the order of the Signer’s Name.

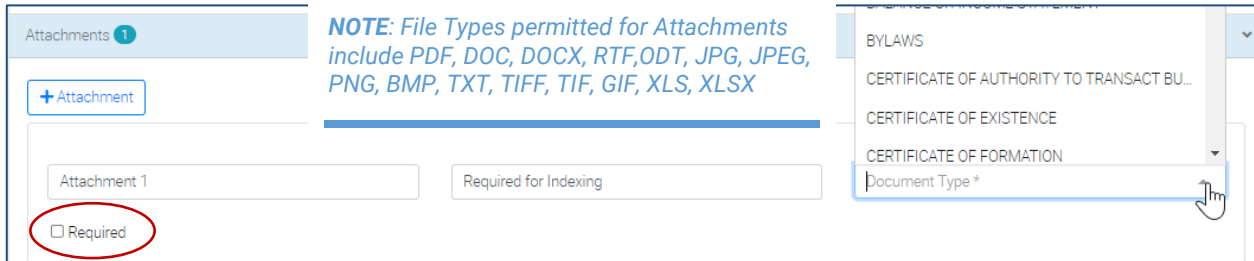

Attachments:

Allow Recipients to add documents to the package.

Enter a name of the document and a description, then select the Document Type from the dropdown list for indexing.

Check the box for Required if the package cannot be completed without the document.

Once all Settings have been configured and all Documents and Recipients have been added, click **Next** in the upper right corner. This will open the Package in the Designer for configuration of signature areas.

To save the Package as a draft to complete later, select **Save**.

The form can also be downloaded using the **Download** button.

Configuring Documents for Signing

The document(s) will open in the Designer, with the Recipient information on the left and the document thumbnails on the right. From here, all fields, including Signature Areas, will be added for all Recipients.

Adding Signature Areas

Click Recipient's Name and then **Signature** in the left menu to create a box for the highlighted Recipient's signature.

The screenshot shows the 'New Account Documents' interface in 'Draft' mode. On the left, there is a sidebar with 'RECIPIENTS' (Mary Lamb) and 'FIELDS' (Signature, ML Signer Initials, Signing Date, Signer Name, Signer Title, Signer Company). The main area displays a form with the following sections:

RELATION TO OWNER	Self
TYPE OF CHARGES	
AUTHORIZED AMOUNT	
DATE OF CHARGE	

AUTHORIZATION OF CARD USE

I certify that I am the authorized holder and signer of the credit card reference above. I certify that all information above is complete and accurate.

I hereby authorize collection of payment for all charges as indicated above. Charges may not exceed the amount listed above in the "AUTHORIZED AMOUNT" field. I understand this is only for up to this amount during the time period of "DATES OF CHARGES" referenced above. If additional charges are going to be authorized a new form will have to be completed.

CARDHOLDER NAME	Click-to-Sign		
SIGNATURE	Mary Lamb	DATE	1/28/15

On the right, there is a 'DOCUMENTS' panel showing 'Electronic Dis...' and 'DebitCardApp'.

The signature box can be moved by clicking and dragging it to the desired area on the document.

Repeat until all Signature Areas for all Recipients have been added.

Signatures will default to **Click to Sign**. In order to require a Recipient to sign using their finger, stylus or mouse, set it to **Capture Signature**.

Click on the edit pencil within the signature area

Use the drop-down menu under *Signature Settings* on the right to select **Capture Signature**

The 'Signature Type' drop-down menu is open, showing the following options:

- Click-to-Sign
- Click-to-Sign
- Capture signature**
- Click-to-Initial

Duplicate or Delete the signature by clicking on the three dots within Field Settings:

The screenshot shows a 'FIELD SETTINGS' dialog box for a field with ID 'qHGnQ81yCr12'. The dialog has two main options: 'Duplicate' and 'Delete'. Below the dialog, there is a table with the following data:

RELATION TO	TYPE OF CHARGES	AUTHORIZED AMOUNT	DATE OF CHARGE

Below the table is the 'AUTHORIZATION OF CARD USE' section with two checkboxes:

- I certify that I am the authorized holder and signer of the credit card reference above. I certify that all information above is complete and accurate.
- I hereby authorize collection of payment for all charges as indicated above. Charges may not exceed the amount listed above in the "AUTHORIZED AMOUNT" field. I understand this is only for up to this amount during the time period of "DATES OF CHARGES" referenced above. If additional charges are going to be authorized a new form will have to be completed.

At the bottom, there is a signature field with the following data:

CARDHOLDER NAME	SIGNATURE	DATE
	Click-to-Sign Mary Lamb	1/29/15

On the right side, there is a 'Layout' and 'Field Formatting' panel. The 'Layout' section shows X: 237, Y: 909, Width: 245, Height: 54. The 'Field Formatting' section shows 'Font Size' set to 'Inherit from parent'. A dropdown menu is open, showing options: 'Click-to-Sign', 'Click-to-Sign', 'Capture signature', and 'Click-to-Initial'.

Layout and Field Formatting parameters can also be changed manually here.

Creating and Using Layouts

Layouts can be created and later applied whenever that same document is added to an Online eSign transaction.

In the following example, the signature lines on the document **"Account Agreement"** are on pages 1 and 3 of the document. Once signature boxes have been added, the *layout* of those signatures can be saved and then applied the next time that document type is attached to a Transaction.

To begin, apply signature boxes to their respective locations on the document.

Once signatures and/or initials have been added, additional fields can be applied, such as **text fields**, **radio buttons**, and **checkbox boxes**.

Once all fields have been created, click the Save Layout icon

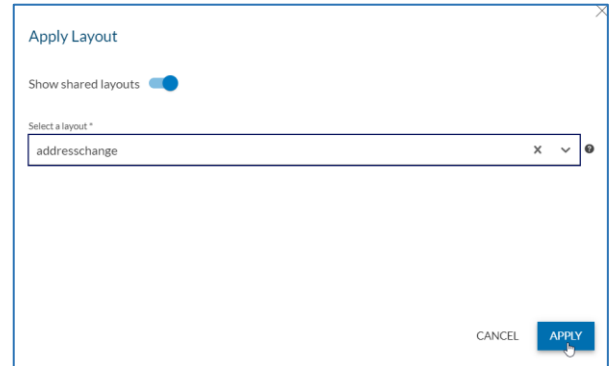

Note: Toggle the **"Share layout"** button to share this layout with other users on the account.

Applying Layouts

When creating a new Package, select the “Apply Layout” icon to choose the desired layout from the list of layouts.

Once layout has been selected, click “Apply.” All pre-configured Signature areas and Fields will be applied to the new Package.

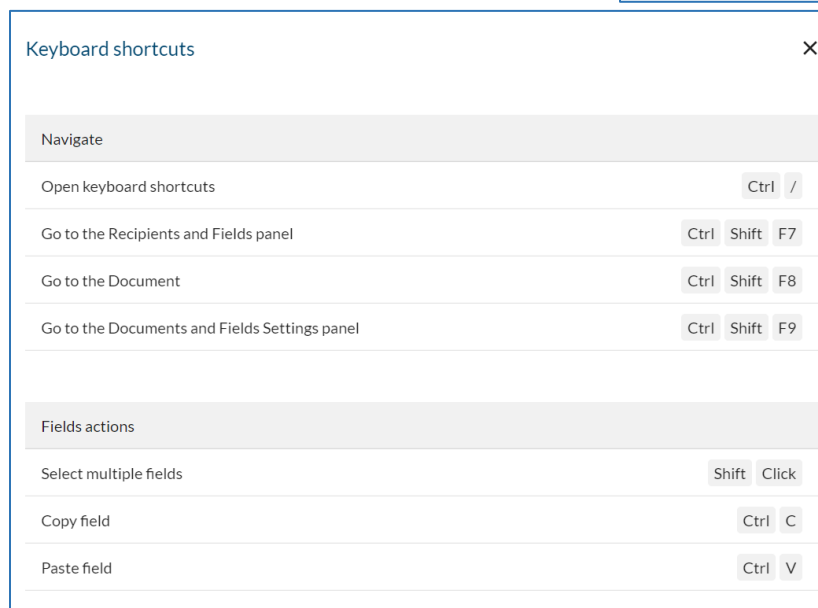

Removing Layouts

To delete a Layout from the list, please contact Identifi Support for assistance.

Keyboard Shortcuts

To assist with form design, keyboard shortcuts are available in the top right menu next to Layouts.

Using Two Factor Authentication

For installations using two-factor authentication on Packages, Senders may need to enable it when adding Recipients to a Package.

These settings are located beneath the name of the Recipient.

The Two Factor authentication methods offered are **SMS**, **Q&A** and **KBA**.

Note: Users may not be able to override a default authentication method on some profiles.

Note: Each Profile will have a default Authentication method (Email, SMS, Q&A or KBA) If the Profile is set to allow it, a User may override this selection when sending a Package.

SMS

When SMS as the two-factor authentication is enabled, the recipient will receive a unique code that must be entered before signing can be completed

1. Select **SMS**.
2. Then enter the signer's cell phone number in the field provided. Choose Country from the drop-down if international number is used.

NOTE: This must be a mobile number, not a landline, otherwise the Package will fail.

Q&A

When Q&A is used as the two-factor authentication, the recipient will be presented with questions to verify their identity. These questions, and their correct answers, are entered by the Sender.

1. Select **Q&A**.
2. Enter two questions and their correct answers in the fields provided.
3.  Click the eye icon to mask the answer when the recipient enters it.

Please answer the security question(s) below.

Birthdate
09/18/1970

Last 4 digits of SS

Login

Authentication

Email SMS Q&A

What is your birth date?
9/18/1970

What are the last four digits of your Social Security number
1234

KBA

When KBA is used as the two-factor authentication, the recipient will be presented with questions to verify their identity. These questions are drawn from Lexis Nexis data.

1. Under the “Authentication” section of the form, Place a checkmark in the box next to **KBA**.
2. Enter the required identifying information for the signer.

Authentication

Email SMS Q&A

KBA

Authentication

Email SMS Q&A

KBA

First Name * Last Name * SSN * DOB 

House Num... Street Name * Apt Number City * State (abbreviation) * Zip *

3. What the Recipient can expect:
 - 3-4 questions will be presented

- Not all questions must be answered correctly, however a passing ‘score’ is required. Lexis Nexis considers things like the validity of the SSN, status of the credit report and fraudulent activity in its assessment.
- Multiple attempts are permitted, but there some timeframe requirements:

Timeframe	This specific Configuration (defaults)
24 Hours	Previous Attempts >= (2)
72 Hours	Previous Attempts >= (3)
7 Days	Previous Attempts >= (4)
30 Days	Previous Attempts >= (4)
90 Days	Previous Attempts >= (4)

No matter the type of two-factor authentication configured, the Recipient will now show as *Pending* in the Package Details.

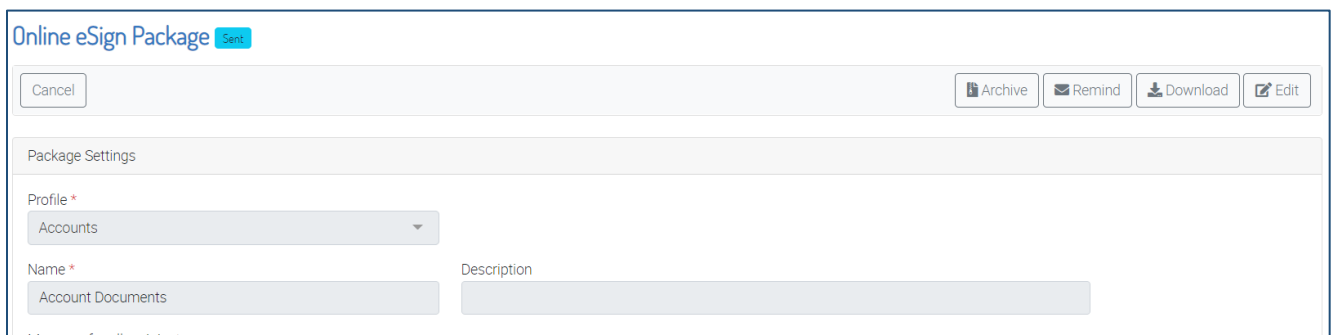

If the authentication fails, the Sender will receive an email and be offered an opportunity to “unlock” the package and resend to the Recipient (see [Managing In Process Packages](#) for details).

Once all Recipients’ authentications settings have been configured, click on **Next** to create the signature areas within the document(s).

Managing In Process Packages

Clicking on a Sent Package in the Online eSign Inbox opens the Package’s details

- ✓ **Archive** sends the package to Archive. The package will be removed from the User’s Inbox and will no longer be available to Recipients for signing. The package is still searchable within Online eSign Search.

- ✓ **Remind:** Resends original email to **all** Recipients that have not yet signed their documents.

- ✓ **Download** – Downloads the documents into a Zip folder.

- ✓ **Edit:** Reopens the documents in the Designer. This action requires that the entire Package be resent to all Recipients.

Recipients									
<input type="button" value="+ Add"/> <input type="checkbox"/> Enforce Signing Order									
Cindy	Rella	identiftraining@gmail	Title	Company					<input type="button" value="Delete"/>
<input type="button" value="Email"/>	<input type="button" value="SMS"/>	<input type="button" value="Q&A"/>	Birthdate (00/00/0000)	08/31/69	<input type="button" value="eye"/>	Last four digits of SSN	1234	<input type="button" value="eye"/>	
<input type="button" value="+ Attachment"/>

<input type="button" value="Email"/>	<input type="button" value="SMS"/>	<input type="button" value="Q&A"/>	Birthdate (00/00/0000)	09/15/70	<input type="button" value="eye"/>	Last four digits of SSN	3456	<input type="button" value="eye"/>	
<input type="button" value="+ Attachment"/>									

When a Recipient has completed their assigned fields in a Package, a green symbol will appear to the right of their name in the Package Details. A red symbol indicates the recipient has not yet signed the documents.

If a Recipient fails to answer the Q&A, SMS or KBA prompts correctly, a blue lock will appear next to their contact details. They will not be able to complete signing until they have been 'unlocked'. Click the blue lock and then **Yes** to confirm. The Recipient will receive an email.

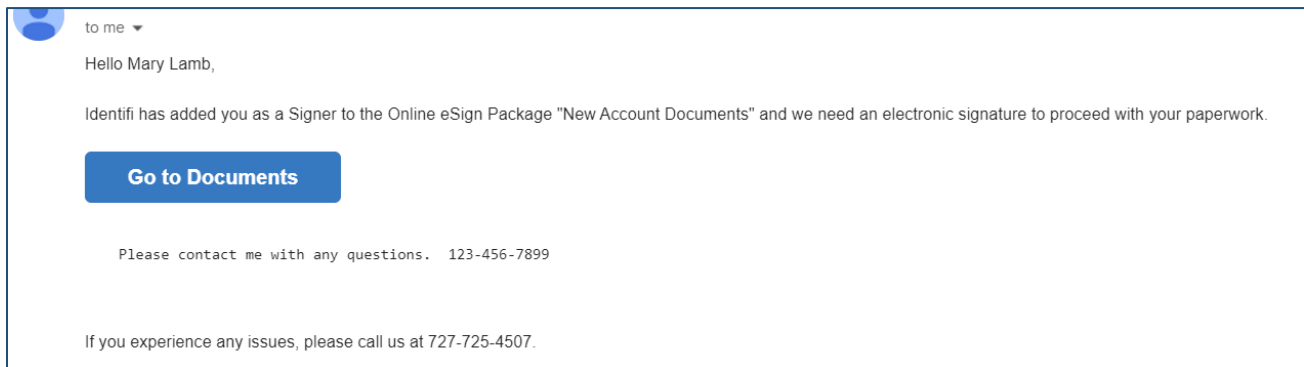

To send a reminder to a specific Recipient, click the Resend Button beneath their name.

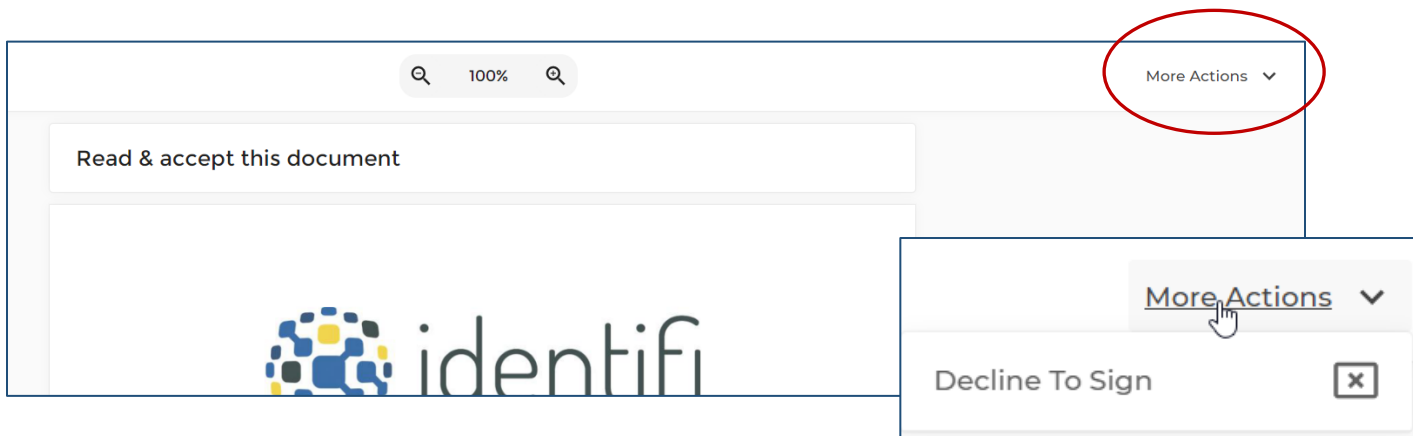

Document Signing

Recipients will receive an email containing a clickable link to the document(s) for signature.

The Recipient will be prompted to **Read & Accept** the disclosure document; they can click to **Decline To Sign**.

More Actions ▾

- **Decline To Sign** will return the package to the originating User.
- Clicking **Accept** will allow Recipient to continue and sign the package

In Packages with multiple Recipients with Signing Order Enforced, once the first Recipient has completed signing, the document is routed to the second Recipient for signature. This process will continue until all signing boxes are addressed.

Note: If a Signer on a Package with Multiple Recipients and Enforced Signing Order opts out of signing, the Package will not automatically move on to the next Signer. The Sender will receive an email and can resend the Package to the remaining Recipients.

When the document has been completed, a message will display to the Recipient requesting that they **Confirm** completing the signing process.

CARDHOLDER NAME	Signed by			
SIGNATURE	Mary Lamb		DATE	1/29/18

Page 1 of 1

Please confirm to complete signing

Confirm

Once confirmed, the Recipient will receive a message that signing is complete and they will have the opportunity to Download Documents to a Zip folder.

📁 package.zip

Signing complete! You may now view or download your signed documents.

We have everything we need at this stage and you may close this window.

[Download Documents](#)

Continue

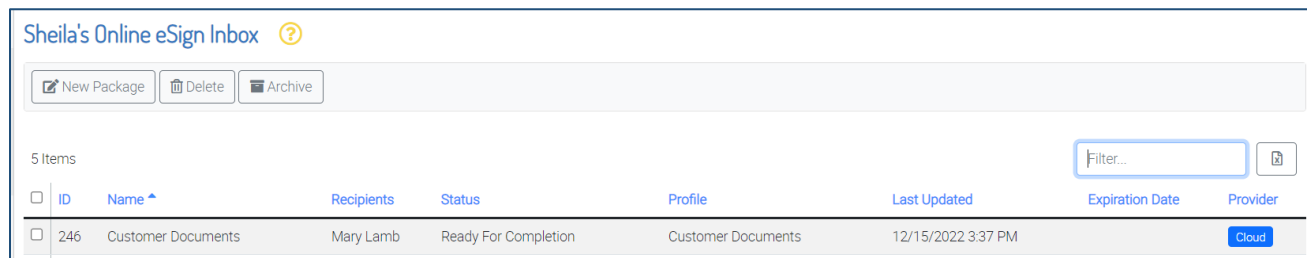

Clicking "Continue" will finalize the signing process.

The Sender will receive an email that signing has been completed and will include a link to the Sender's Online eSign Inbox.

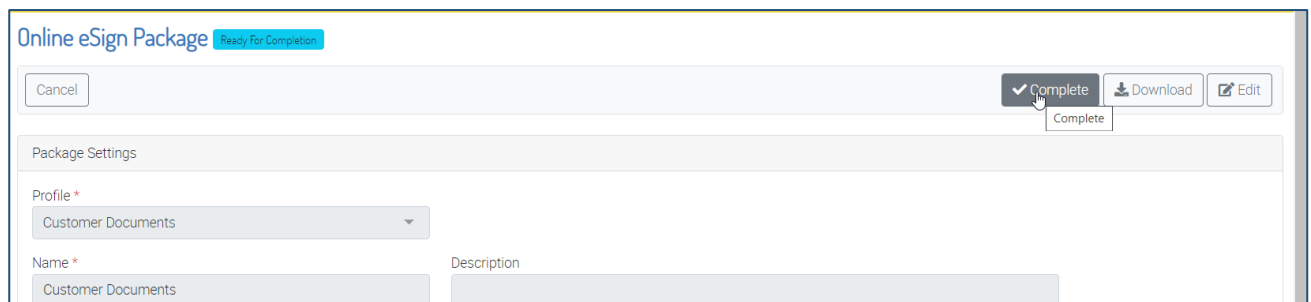

Ready For Completion Packages

Packages that either were set to *Review before completion* or included Attachments will have this Status in the Inbox. The sender will have received an email notification that the documents are signed and are ready for review.

- Reviewing Signed Documents:** Packages sent with *Review before completion* enabled require the Sender complete the package manually from the Package Details.
 - If the documents are satisfactory, click **Complete** in the upper menu. The Package will now be **Ready to Index**.

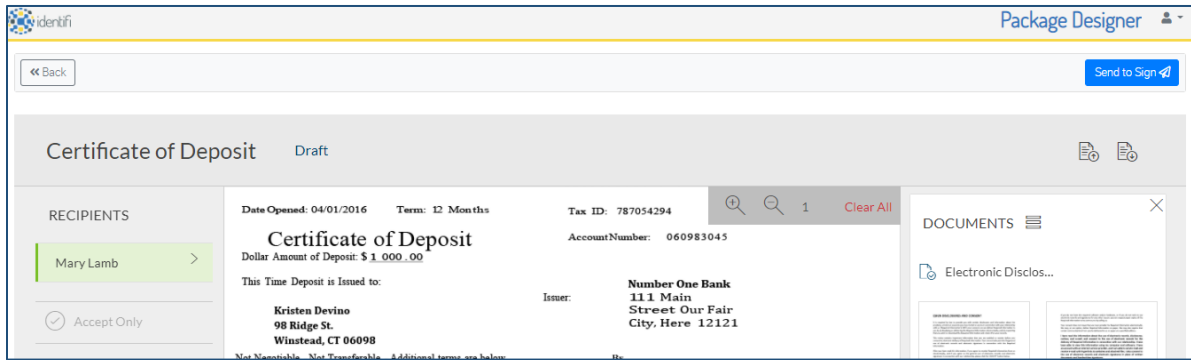

- If changes are needed, click **Edit** in the upper menu to re-open the documents as a Draft. A confirmation dialog box will open.

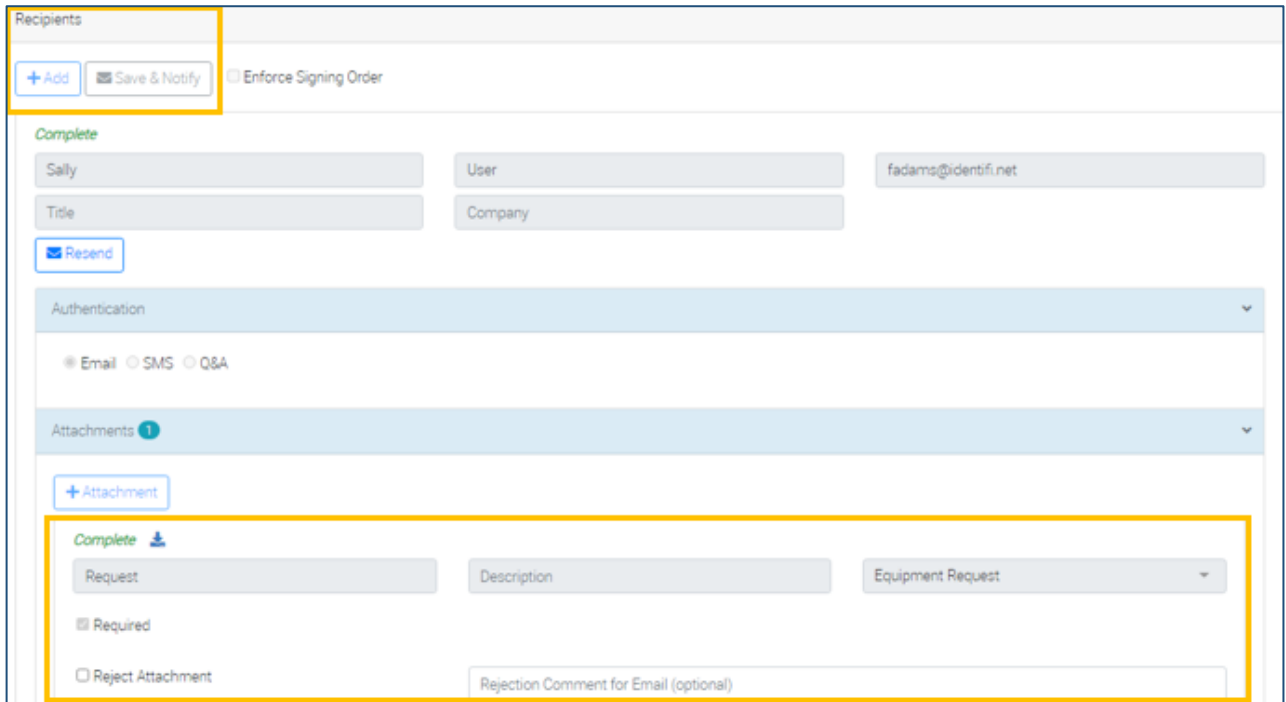

Clicking "Next" will open the Package Designer.

Make necessary edits and click **Send to Sign**.

- **Reviewing Attachments:** Attachments can be reviewed and accepted or rejected before completing the package.

Click the download icon

1. Open the pdf to review the document
2. If the document is not correct, check the box to **Reject Attachment**

Then, optionally, enter a Rejection Comment and click **Save & Notify** next to the Recipient's details. They will have an opportunity to submit a new document.

- When the correct document is attached, simply select **Complete** in the upper menu.

The Package will now be **Signed** and ready to be Indexed.

Signed Ready to Index

Once all documents are signed by all Recipients, and all necessary reviews have been completed, the Package is ready to be indexed.

<input type="checkbox"/>	ID	Name	Recipients	Status ^	Profile	Last Updated	Expiration Date
<input type="checkbox"/>	24	Signature	Forrest Adams	Signed Index Documents	Customers	1/15/2021 11:03 AM	

Clicking **Index Documents** will open the Package in the Indexing Interface. For details on the indexing process, see [Batches](#)

Once indexing is complete, the document images are retrievable through Documents Search and the Package will appear in the Inbox with a **Completed** status.

Completed Packages

<input type="checkbox"/>	ID	Name	Recipients	Status ^	Profile	Last Updated	Expiration Date
<input type="checkbox"/>	21	Video	Joe Schmoe	Completed	Vendors	2/9/2021 12:26 PM	

Packages with a **Completed** status have been indexed but will appear in the Inbox until **Archived**. Archiving the Package will remove it from the Inbox, but its details are always viewable through [Online eSign Search](#)

Reviewing Completed Packages

Clicking on a Package in the Inbox or Online eSign Search results will open the *Package Details*. Completed Packages will have available the Consent Form and Evidence Summary to download.

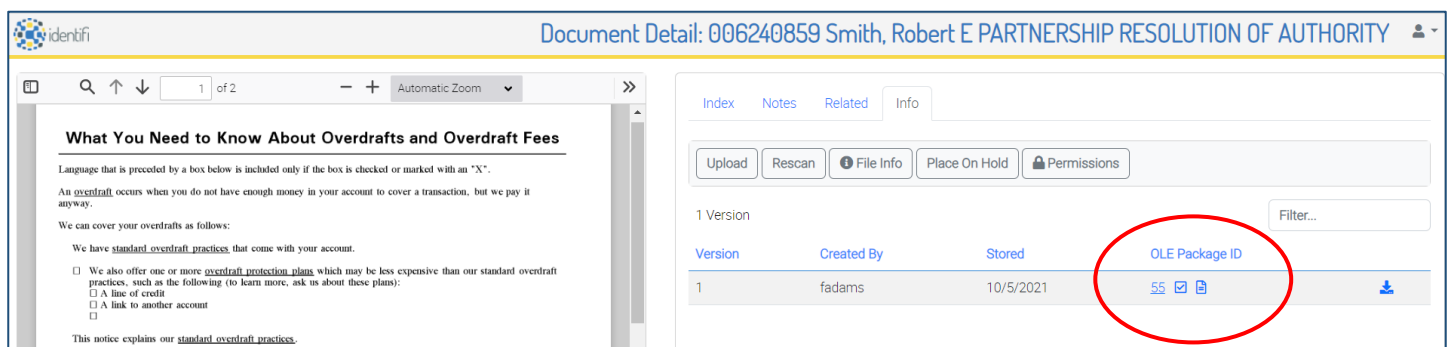

Note: These two documents are available only here; they are not archived with the signed documents.

To view the signed documents, click **View** in the *Documents* section. The documents will open in a new tab in the Documents Viewer.

Once inside the Document Viewer, the OLE Package details will be available from the “Info” panel:

- Clicking the OLE Package ID link will take the User to the Package Details (*pending Permissions*).
- Clicking the  icon will download the Consent Form
- Clicking the  icon will download the Evidence Summary

Note: A document that has been signed using both Desktop eSign signatures and Online eSign signatures will display two versions of the document in the Info Panel: the first for the Desktop eSign signature and the second for both Desktop eSign and Online eSign signatures.

The screenshot shows the 'Info' tab of a document viewer. At the top, there are tabs for 'Index', 'Notes', 'Related', and 'Info'. Below these are buttons for 'Upload', 'Rescan', 'File Info', 'Place On Hold', and 'Permissions'. A 'Filter...' input field is on the right. The main area displays '2 Versions' and a table with the following data:

Version	Created By	Stored	OLE Package ID
2	snolder	8/18/2023	108 <input checked="" type="checkbox"/>
1	snolder	8/18/2023	108 <input checked="" type="checkbox"/>

Retrieval of Signed Documents

Documents signed and indexed through Online eSign are archived like other documents in Identifi and are retrieved the same way as well, through *Documents Search*.

A link to the Online eSign Package Details is provided in the Info Panel of the Documents Viewer. Clicking the **OLE Package ID** will open the Package Details in the existing tab.

This screenshot is similar to the previous one but shows '1 Version'. The table contains one row:

Version	Created By	Stored	OLE Package ID
1	fadams	10/5/2021	55 <input checked="" type="checkbox"/>

The 'OLE Package ID' '55' and its associated icons are circled in red. A tooltip 'Open Package' is visible over the document icon.

Online eSign Search

A User can also search for Packages from “Search” within the Online eSign menu.

Packages can be searched and filtered by date range, the Profile to which the package belongs, Package Status, User name; or the Package ID number.

A screenshot of the 'Online eSign Package Search' interface. The interface includes a sidebar with navigation options: Data, Documents, Tracking, Desktop eSign, Online eSign (selected), Inbox, Search, Workflow, Reporting, Analytics, Setup, and Help. The main content area is titled 'Online eSign Package Search' and features a 'Date Range' dropdown set to 'Predefined' with 'Current Month' selected. Below this, it says 'Dates based on Last Updated Activity Date.' There are three dropdown menus for 'Profiles', 'Statuses', and 'Users'. The 'Profiles' dropdown lists: Customer Documents, HR Documents, HR Test, Loan Documents, New Account Documents, and New Profile Added for Residential Loans. The 'Statuses' dropdown lists: Batch Creation Error, Completed, Declined, Declined Error, Document Processing Error, Draft, Error, Expired, Expired Error, and Identifi Archived. The 'Users' dropdown lists: aaa, Alex Williamson, Billy Hartman, Christie Russell, Dave Richardson, Dev User, Document Admin, Eric Medeiros-Rice, Forrest Adams, and Frank Marcario. At the bottom, there is a 'Search By Package ID' section with a text input field 'Enter Package ID's to Search for...' and a note 'Type a Package ID and press the Enter key to add it to the list.' Below the input field are 'Submit' and 'Reset' buttons.

Viewing Search Results

Clicking on a package in Search Results will open the Package Details. From here the documents and Evidence Summary can be downloaded for *Completed* and *Archived* packages. *Draft*, *Sent* and *Review Before Completion* Package Details opened from Online eSign Search allow for the same actions as when opened from the Inbox.

Electronic Receipts

Launching Receipts

Receipts is configured to launch when certain transactions are performed from your host system. For example, when an account withdrawal is processed, Receipts will launch and present a signature area for the customer to sign. Depending upon settings, a paper receipt may print as well.

Client Types

A user's workstation will be set up as one of the following types:

- **Teller-** presents a signature box for signing and prints a customer copy, if configured and electronic copy will be stored in Documents automatically
- **Drive Thru-** automatically stores an unsigned electronic copy of the receipt and prints a barcoded receipt for signature which will be scanned into Documents to replace the unsigned copy, a customer copy is also printed if configured
- **No Print Teller-** presents signature box and stores electronic copy of receipt, but no receipts will be printed

Signing Receipts

When working at a workstation in **Teller** or **No Print Teller** mode, Receipts will present a Signature Box for the customer to sign.

Accept - confirms signature is correct and complete signing requirement

Accept No Print- applies the signature to the electronic copy of the receipt, but does not print a paper receipt.

Re-sign removes the signature from the signature pad and requires customer to sign the pad again

Notes opens a pop-up box to add text data that will appear in the Notes Panel in the Document Viewer

Sign on paper sets the transaction into **Drive Thru** mode, prompting two receipts to print. The customer will sign the barcoded receipt and receive the non-barcoded receipt to take home.

Skip Sign releases the pad from requiring a signature and sends a copy of receipt image to Documents. **Skip Sign** is generally used for transactions that were not flagged as an Exception but do not require a customer signature.

Cancel ends the transaction in Receipts only. It does not send data back to the host system. An image of the receipt is sent to Documents for security.

Tablet opens a pop-up listing all available configured signature pad models associated with Receipts. **This is generally only used when a signature pad is being replaced with a different model.**

Wet-Signing Receipts

Drive Thru Mode

When a transaction requiring a signature is processed at a workstation in this mode, Receipts will print two copies of the receipt- a barcoded one for the customer to sign and a copy for the customer to take with them. An unsigned copy of the electronic receipt is also placed in the Documents archive, which will be replaced by the signed copy when the barcoded receipt is scanned.

Sign on Paper

When this action is selected from the Signature Box menu, two receipts are printed- one barcoded and the other not- just like *Drive Thru Mode*. The barcoded receipt is to be signed and scanned to replace the placeholder copy in the archive, the second copy is for the customer.

Scanning Receipts

1. Launch the Scan Client
 2. Select the Receipt Scan Plan
 3. Place all receipts in the scanner and click Add
 4. Complete the Batch. Receipts will auto-archive, no indexing required.
-

Document Tracking

Document Tracking is entity-driven and based on Tracking Sets. When a new entity item is added to Identifi Data from the host system, Tracking begins “looking” for required documents based on the Tracking Set associated with that type of item.

Missing required documents will cause an entity item to be in **Exception** status and will show as pink in **Data Search** results.

The screenshot shows the 'Search Data' interface. A search bar contains 'KWYK Search...'. Below it, there are 'Delete' and 'Tracking' buttons. The main area displays '7 Entities' with a table. The table has columns: Title, Entity Type, Storage Date, Account Number, Customer Type And Number, Event Date, Event Type, Major Type, Minor Type, Quote, Request Date, and Tax ID Number. One row is highlighted in pink, indicating an exception status.

Title	Entity Type	Storage Date	Account Number	Customer Type And Number	Event Date	Event Type	Major Type	Minor Type	Quote	Request Date	Tax ID Number
1000474291 - Overdraft Line of	Accounts	7/10/2017	1000474291				CNS	LOC			

Document Tracking Inbox

The screenshot shows the left-hand navigation menu of the Identifi application. The 'Inbox' option is highlighted with a blue bar, indicating it is the active or selected view.

Opens the User’s Tracking Inbox. Pending items or Exception items assigned to the User will be displayed and accessible here.

Two tabs are displayed:

- **Pending** (Default tab)– Displays items that are nearing Exception status
- **Exceptions** – Displays items that are in Exception status

Filter Pending items by **Date Range**, specific **Document Type** and/or **Roles** (Note: multiple selections can be made within Document Type and Roles). Filter Exception items by **Document Type** and/or **Roles**.

The screenshot shows 'Sheila's Document Tracking Inbox'. At the top, there are two tabs: 'Pending' (with a blue circle around it and a '3' indicator) and 'Exceptions' (with a '5' indicator). Below the tabs, there are three filter sections: 'Date Range' (set to 'Next 30 Days'), 'Filter By Document Type' (with a dropdown menu), and 'Filter By Roles' (with a dropdown menu).

Date Range

- Next 30 Days
- Current Month
- Next 7 Days
- Next 30 Days
- Next 60 Days
- Next 90 Days

Filter By Document Type

Document Tracking Search

Using Data Search for Document Tracking searches works the same as any other search. See [Data Search](#)

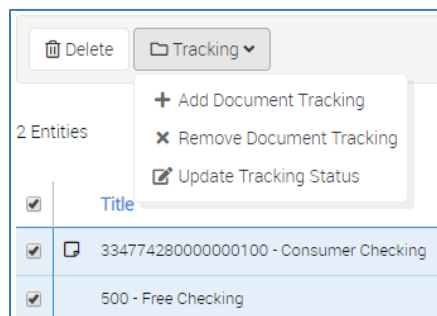

A common Tracking search will include the 'Exception' status.

Specific entity items can be used for searching as well, such as names, account numbers, identification numbers, etc.

Note: Entity Permissions are required in order for the user to have access to retrieve items through Data Search.

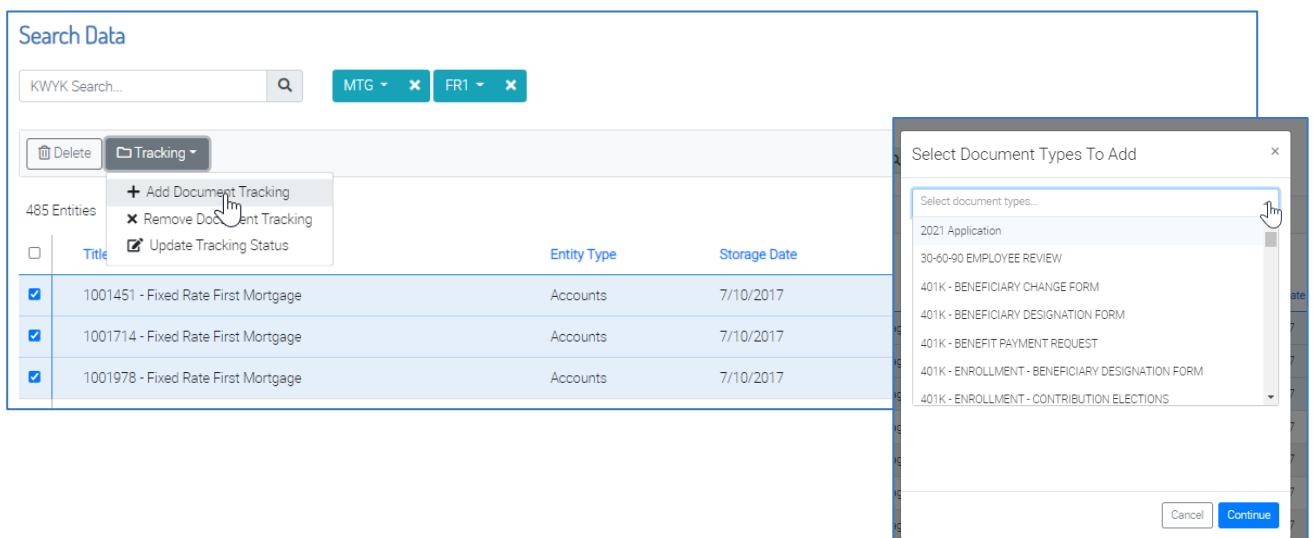

Updating Tracking from Search

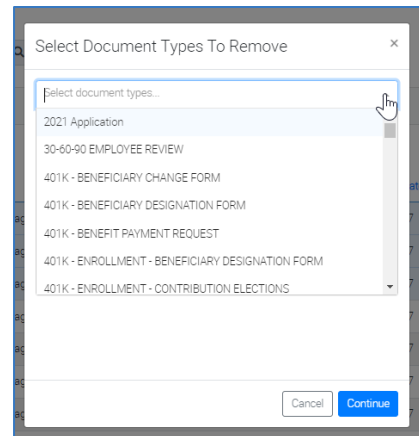

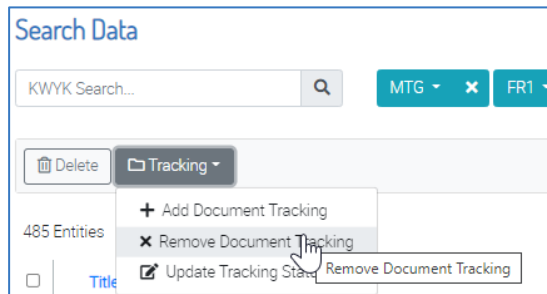

Tracking Requirements can be added to multiple accounts directly from the Data Search menu bar.

From Search results, select the accounts to which the Tracking Requirements will be added and from the drop-down menu in the Tracking icon, select "Add Document Tracking"

Select the Document Types to add as a requirement on the selected accounts and click "Continue."

Requirements can also be removed from selected accounts in the same way, selecting “Remove Tracking Requirements” from the Tracking drop-down.

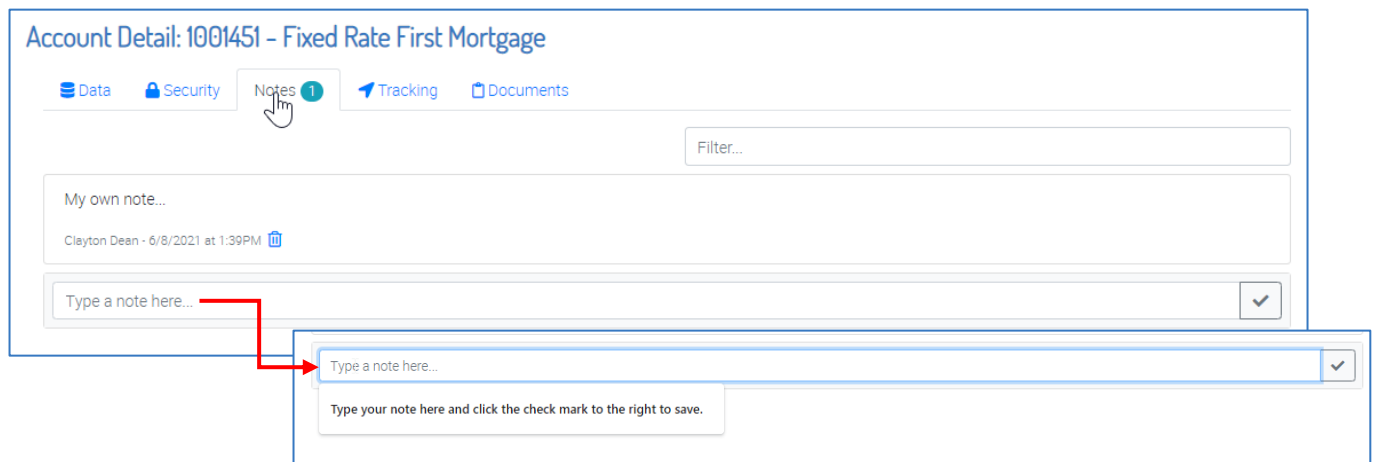

Viewing Tracked Entity Items

Viewing Tracked Entity Items is very much like viewing other Data Entity Items. Depending upon Permissions, the user will have access to the **Data**, **Notes**, **Security**, **Tracking** and **Documents** Tabs. In this section, tabs will be discussed as they related to Document Tracking, for more details, see [Viewing Data Items](#).

Notes Tab

Entity Notes are used when information related to the entity item needs to be conveyed, such as when a Requirement has been added to or removed from a Tracked Item.

Tracking Tab

All Tracking Requirements associated with the Entity Item are listed here.

<input type="checkbox"/>	Document Type	Frequency	Date Due	Grace Days	Status	For
<input type="checkbox"/>	Car Loan	Recurring	11/8/2022 12:00 AM	5	Because I said so	0 /
<input type="checkbox"/>	Car Loan	Recurring	11/8/2021 12:00 AM	0	Past Due Exception	0 /
<input type="checkbox"/>	Car Loan Clone	One-time	11/8/2021 12:00 AM	0	Found	1 /
<input type="checkbox"/>	Car Loan Dup	One-time	11/8/2021 12:00 AM	0	Found	1 / 1

- Documents in **Exception** Status will be highlighted pink.
- Documents in **Pending** Status will show simply as a line item.
- Documents that have been **Found** will have a blue hyperlink. When clicked, the document will open in the Document Viewer.

Tracking Requirements or Tracking Sets can be Added here and Tracking Requirements deleted.

A Best Practice is to include a note regarding the details of the status override. Adding a note under the *Notes* Tab here will create a note directly associated with the requirement (unlike a Note added under the entity *Notes* Tab).

Mass Updating

Mass Updating of Document Tracking Statuses

This feature allows the User to mass update the Document Tracking Status for multiple Business Entities-directly from Data Search Results.

For example, to waive requirements for closed accounts, the User would search for all closed accounts and manually waive the Tracking Requirements for those accounts. Users have the option to update Exceptions, Pending Requirements or both at once.

The screenshot shows the 'Search Data' interface with a search filter set to 'Closed'. A table displays search results with columns for Title, Entity Type, Storage Date, and Account ID. Two rows are visible, both for 'Fixed Rate First Mortgage' accounts. A context menu is open over the second row, showing options: 'Add Document Tracking', 'Remove Document Tracking', and 'Update Tracking Status'. The 'Update Tracking Status' option is selected, opening a dialog box titled 'Update Tracking Status'. The dialog has a 'Status' dropdown set to 'Waived' and a 'Requirements to Update' section with three options: 'Pending Requirements Only', 'Exceptions Only', and 'Both Pending Requirements and Exceptions'. The 'Both Pending Requirements and Exceptions' option is selected. 'Cancel' and 'Continue' buttons are at the bottom.

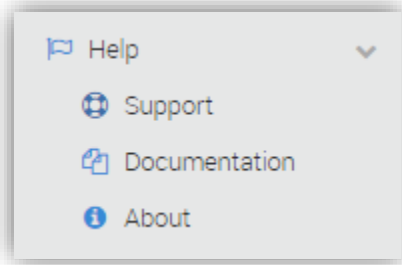

Mass Updating of Document Tracking Requirements

This feature enables updates to multiple Tracking Requirement Attributes at once.

For example, if the Due Dates, Grace Days and Status all need to be modified, or the same note needs to be added to multiple requirements on a Business Entity, these changes can be made all at once by clicking "Apply."

The screenshot shows the 'Account Detail' page for account 3347742800000000100. A 'Tracking' tab is active, showing a table of '3 Document Requirements'. One requirement is selected: 'ACCOUNT INFORMATION SHEET' with a frequency of 'One-time', due date of '6/19/2018', 0 grace days, and a status of 'Past Due Exception'. A 'Mass Edit' button is highlighted, opening a dialog box titled 'Mass Edit Tracking Requirement Rules'. The dialog has a section 'Check the requirement rules you wish to update.' with four checked options: 'Grace Days', 'Due Date', 'Status', and 'Note'. Each option has a corresponding input field. 'Apply' and 'Cancel' buttons are at the bottom.

Help

Support

Clicking on the **Support** link from the main menu will launch the Identifi Support page (www.identifi.net/support) in a separate tab. This link provides the User with information for contacting our Support Center for additional assistance.

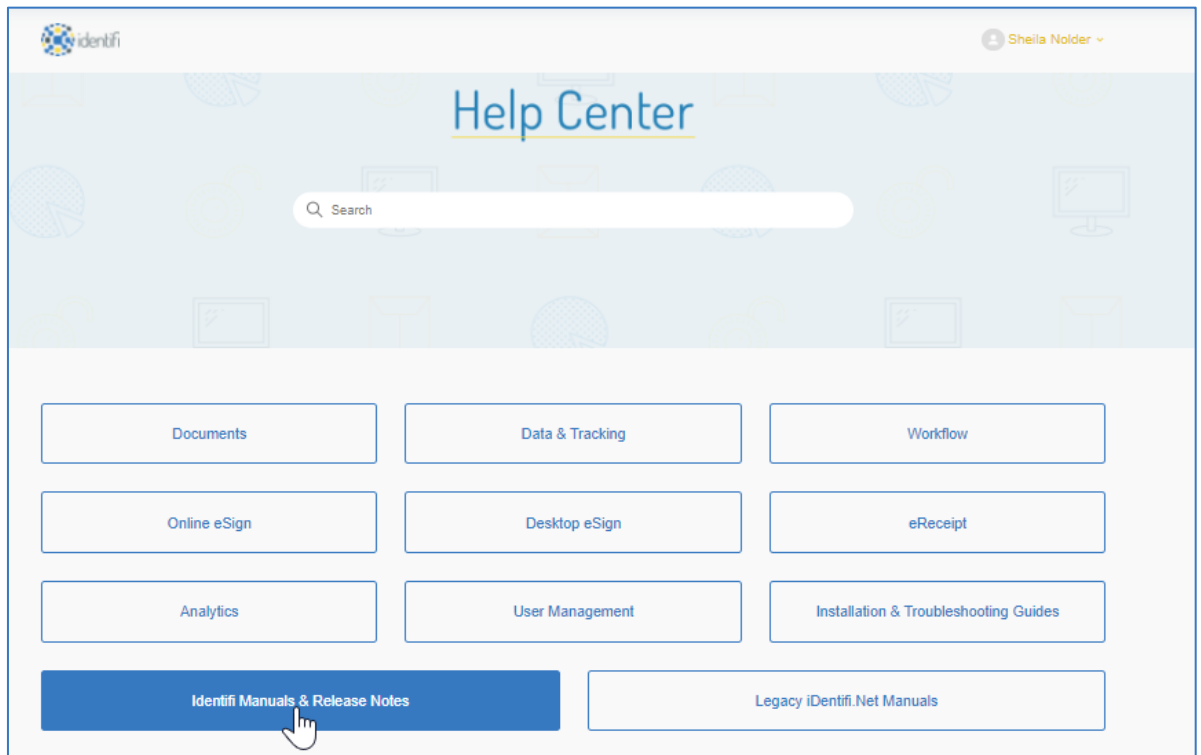

There is also a link to submit an enhancement request for improvements to the Identifi product.

Documentation

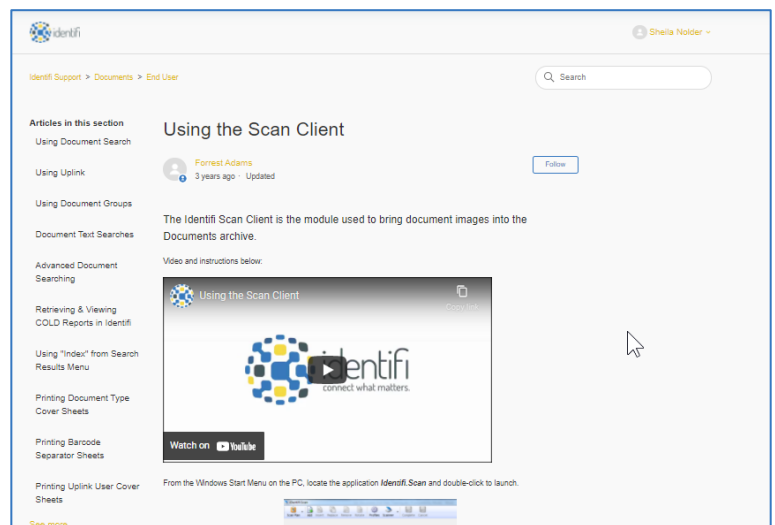

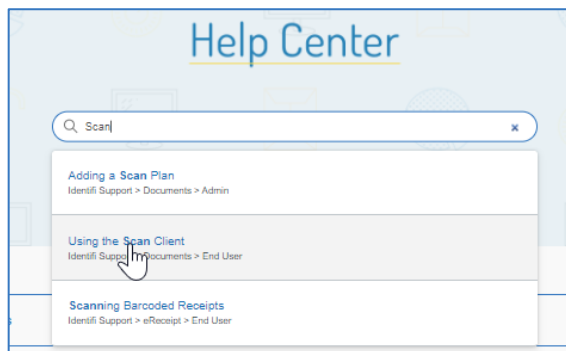

Clicking on the **Documentation** link from the main menu will direct the User to a separate tab and provide links to articles and videos pertaining to topics within the Documentation Library.

User manuals are located beneath the **“Manuals and Release Notes”** section.

Users are also able to search within Documentation Library articles and view their most recent search activity.
